AADCO 9800 CMOS C-Arm Flat Panel Retrofit Kit

The 9800 CMOS is the first fully developed digital flat panel retrofit kit designed specifically for the GE/OEC 9800 mobile C-arm. A combination of the latest in CMOS technology and over 20 years of mobile imaging software development experience allows the 9800 CMOS to not only extend the life of your existing 9800, but provide vast improvement in both image quality and dose reduction, allowing for better, more efficient patient care. The 9800 CMOS fully integrates with original GE Software and brings your GE c-arm into 21st century CMOS imaging at a fraction of the price of a new C-arm.

Active Area | 22 cm x 22 cm
Detector Type | CMOS
Scintillator | Crystalline Silicon
Field of View | 40% Larger than 9" Image Intensifier
DQE (Detective Quantum Efficiency) | > 70% at 0.5 lp/mm
Weight (Entire Assembly) | 55 lbs.

**FEATURES**
- Best in class, low dose image quality
- No warm up time needed
- 30fps at full resolution
- Stable offset calibration
- 100 um pixel pitch
- Low power dissipation
- Up to 200fps in binned ROI modes
- Defect pixel correction
- Reduced image lag
- Gigabit ethernet data interface
- Instant mode switching

**TYPICAL PERFORMANCE VALUES @RQA5**

| Panel Size | 22cm x 22cm |
| Scintillator | Medical-Grade Columnar CsI |
| Saturation Dose | RQA5 (per mode) 2 uGy / 10 uGy / 40 uGy |
| Dynamic Range (per mode) | 70 dB / 75 dB / 77 dB |
| MTF @ 1 lp / mm / 2 lp / mm | 60% / 27% |
| DQE(0) @ 1 uGy, RQA5 | 75% |
| DQE(0) @ 10 nGy, RQA5 | 68% |
| Image Lag (1st Frame @ 30fps) | 0.1% |
| X-Ray Energy Range | 15-150 kV |

**List Pricing**

9800 Flat Panel Retrofit Kit only (#C-9800RF) $65,000*
9800 Monitor upgrade kit only (#C-9800M) $13,600*
Refurbished 9800 C-ARM w/ Flat Panel Retrofit & Monitor Upgrade (#C9800FP) $139,000*

AADCO's "Lightning Plus" Instant DR Solution

The Lightning Plus allows the end user to use DR in any existing x-ray Room (Radiographic) or with any x-ray portable. Amazingly, it requires no installation or calibration. The Lightning Plus works with your x-ray system’s photo-timer or even when there is no photo-timing, using conventional radiographic techniques. It includes a wireless 17”x17” Cesium Iodide DR Imaging panel (weight 6 lbs.) and a 15.6 inch touchscreen laptop workstation. The system includes all necessary image acquisition, image processing software, and DICOM compatibility.

Hardware Workstation
- BladeView Software
- Screen Size 15.6-inch Touchscreen
- Max Screen Resolution 1920 x 1080
- Processor, 2.5 GHz Intel Core i7
- RAM, 8 GB DDR3 SDRAM
- SS Hard Drive, 256 GB SSD
- Graphics Co-processor, Intel Integrated Graphics,
- Chipset Brand, intel
- Card Description, integrated, Wireless Type, 802.11 A/C
- Average Battery Life, 8 hours

Flat Panel
- 17” x 17” Cesium Iodide wireless DR Imaging panel
- Total weight, only 6.3 lbs.

BladeView Software
BladeView software provides robust, real-time harmonization of all image elements, so that the huge dynamic range of DR can be appreciated. Software provides world class image quality the first time, every time, and fast, reliable connectivity to remote PACS and image management systems. The simple touch screen design provides "two click image acquisition".

SOFTWARE FEATURES
- Digital radiographic acquisition
- Stitching
- New Patient, Emergency, Manual Data Entry or WorkList
- Integrated generator control
- Integrated collimator control
- Protocol defined acquisition image enhancement
- DICOM store, print and media creation
- DICOM worklist
- Video outputs for control station monitor
- Review Image Processing
- True multi-scale image processing
- Automatic rad code import
- Zoom and roam
- Magnifying glass
- Flip
- Rotate
- Window and level, invert
- Text insertion
- Measurement package
- Image cropping
- Multi image display

AADCO American™ Flat Panel C-arm

Proudly Designed, Engineered & Assembled in the USA

About AADCO American™ C-arms

• Designed & Engineered in the USA
• USA built Premium Software
• Supported by a USA-based Team of Software Engineers
• Nationwide Installation & Service Available

This C-arm provides a 15kW, high performance generator, with matched performance rotating anode x-ray tubes. This system provides high performance pulse fluoroscopy for crisp imaging and ALARA dose savings.

AADCO American™ C-arms feature 135 degree orbital rotation and generous 31.5 inches free space, as well as rotating touch screen control tablet on the C-arm with customizable menus and controls. Standard flat panel amorphous silicon imager. Our USA-built premium software includes versatile diagnostic tools, database management and custom capabilities.

Monitor Cart provides articulated single post monitor with outstanding positioning capability for two 19" LCDs, with optional touch screen capability. RH Touchscreen monitor provides easy patient data entry & image archive recall.

AADCO Mechanical Specifications:
• C-arm length 75 inches (1900mm)
• C-arm Width less than 31.5 inches (800mm)
• Vertical motorized travel of 17.7 inches (450mm)
• 360 degree C rotation (200 degrees clockwise & counterclockwise)
• Orbital under scan at least 90 degrees
• Orbital over scan at least 45 degrees
• +/- 12.5 degrees wig wag (manual)
• 200 mm(7.8 inches) horizontal travel (manual)
• Free Space = 33 inches (838mm)
• Depth of C = 27.6 inches (700mm)
• Reliable blade X Ray Collimation

Options:
• 31 x 31cm Amorphous Silicon Flat Panel or CMOS Panels Available.
• DSA (Digital Subtraction Angiography) with Roadmap
• Thermal Printer

Features:
• 15kW, High Performance Generator
• High Performance 300K HU Rotating Anode X-Ray Tube
• Standard 22x22cm Flat Panel Amorphous Silicon imager
• High Performance Software Made and Supported in the USA
• 135° Orbital Rotation
• 40 inch (101.6 cm) Source to Image distance
• true 31.5 inches (800mm) of Free Space
• Integrated tilt/swivel Touch Screen Tablet Controls on C-Arm.
• High Resolution twin 19” LCD Flat Panel LCD Medical Grade Monitors with RH touchscreen monitor data entry & Image review
• Tube-side Integrated Laser Aimer
• Virtual Collimator
• DICOM 3.0 Easy Archiving and Documentation
• Monitor Cart with twin LCD landscape mounts for 19” LCDs.
• USB & CD/DVD

Nationwide Sales, Installation & Service   1-800-225-9014   www.aadcomed.com
The AADCO Motorized Straight Arm is a totally integrated system combining modern technology of a High Frequency CPI X-Ray Generator with Digital Flat Panel technology for Direct Digital Image acquisition, designed with a user-friendly, intuitive operating system for easy motorized positioning of any patient.

Positioning control for all movements is available on a 6” color Touch Screen console and 12 key wireless control pad, enabling control of SID distance, height of swivel C-arm, and angulation of the swivel arm and detector. The angles and SID are displayed on the Touch Screen. All movements stop anytime the switch is released.

Single-Button positioning: 1m and 1.8m chest position or 1m table position, and preset angle positioning on the Touch Screen. Seven positioning programs for the most common studies and tests are available on the 6” color touch screen control display, making one touch positioning possible after selecting the program.

Intelligent anti-collision system works with 3 laser beams and pressure sensors located on the arm and skins of detector to avoid harm to patient. Red LEDs display which sensor is activated on the power cabinet. If resistance pressure is greater than 10kg, is detected, the vertical movement will stop and then move back 10cm in the opposite direction.

Application Programming Interface (API): The system movements are integrated with Acquisition Console in 7 different positions. An anatomy select on the study menu allows the automatic positioning to run with the press of the hand switch.

Specifications:
- Maximum/Minimum focal-spot-to floor distance: Mac 1690mm-400mm, Vertical travel: 1290mm, speed: 40mm-150mm/S.
- Arm rotation: +120° to -30°, range: 150°, speed: 3° to 10°/S.
- Detector rotation angulation +45°CW/-45°CCW, range: 90°, speed: 1° to -3°/S.
- Motorized SID travel: 1000mm to 1800mm; speed: 10mm to 130mm/S.
- Dimensions (LxGxW): 2045 x 2300 x 770mm. Net Weight: 320kg, Power: 110/220VAC/50-60Hz/10A.
- Minimum room ceiling height: 2700mm.
- Ship crate size: 2540 x 1070 x 1400mm.

Options:
- Auto-Stitching in vertical direction. Auto collimator & tracking (collimator light field changes with SID variation).
- Workstation, Auto Positioning (APR) and 10” Color Touch Screen Controls

AADCO S-Arm DR Advantages
- Easy Maneuvering
- Optimum Flexibility for Exams
- Improved Workflow
- Superior Image Quality
- Image Access within seconds
- Digital Image Processing
- Robust Digital Image Enhancement

Standard Features Include:
- Universal Motorized Straight-arm with Wireless Control
- Csi FPD and Workstation Software
- 50/65 KW X-ray Generator
- X-ray Tube and HV-cable and X-ray Collimator
- 12 key Wireless Control
- Anti-collision / One-touch Positioning
- Includes imaging Table

The AADCO DR-300 includes a heavy-duty Overhead X-Ray Tube System DRC-2200 characterized by its simple and functional, lightweight design. The AADCO DRC-2200 assures highly precise positioning for an optimal DR result. This tubestand can cover nearly the entire area of the room in which it is installed. Combined with a T-300 Mobile 4-way float top Table and a vertical bucky, it is a complete 1 Panel DR Solution in a more traditional form factor.

**T-300 4-Way Float Top Table**
- Battery operated for full day use on one battery charge
- 270kg. (594 lbs.) evenly distributed weight load capacity
- Table Dimensions: Width: 31.5" Length: 82.6" in Length
- Longitudinal Travel 31.5" (800mm)
- Transverse Travel 11.8" (300mm)
- Locking casters on front wheels
- Table Weight: 286 lbs (130kg)

**DRC-2200 Tube Stand Features:**
- Motorized 3-way Tubestand Movement
- Touch screen displays SID/angle, Detector Height/angle & 12 functions
- Switch from manual to motorized with one touch
- Switch from manual to motorized with one touch
- Single Button positioning
- Motorized Servo Tracking with Wall Bucky
- Integration with CPI generators
- Longitudinal rail 3800mm, travel 2950mm
- Tranverse bridge 2500mm travel 1600mm
- System weight 220kg
- Power 110/220 VAC/50-60 Hz/5amps
- Telescoping Carriage Size (LxWxH) 713x620x980mm

**DRS-1800 Bucky Stand**
- Motorized wall stand
- 6" TFT Touch screen
- Single Button Positioning Chest or Table
- 12 Key Wireless Control
- Vertical Travel 1350mm
- Maximum Carrying Capacity 90kg
- DH Rotation 180 Degrees (+90/-90)
- Manual Swing (+90/-90) w positive lock optional
- Stand Weight 225kg
- Dimensions (LxWxH) 595x322x2106mm
- Auto-positioning
- Auto-tracking

**On Sale Now**
- Complete Single Panel DR Room Installed
- Item # DR-300 with 50kW CPI Generator
- Now $131,175

Nationwide Sales, Installation & Service 1-800-225-9014 www.aadcomed.com
The AADCO DR-400 includes a heavy-duty Overhead X-Ray Tube System DRC-2200 characterized by its simple and functional design. With its lightweight design, the AADCO DRC-2200 guarantees highly precise positioning for optimal DR result. This tubestand can cover nearly the entire area of the room in which it is installed. Combined with a T-220 4-way Carbon Fiber 4-way float-top Bucky Table and our versatile DRS-1800 vertical bucky, it is a complete 2 Panel DR Solution in a traditional form factor.

DRC-2200 Tube Stand Specifications
This Motorized ceiling mounted X-ray tube suspension system is designed to facilitate a wide range of procedures. The heavy-duty and fully counter-balanced system moves easily for faster patient positioning with minimal operator fatigue. The Manual movement pressure is only 2 kg.

12 key wireless control enables all motion both of CMT and Wall stand. The 6” color Touch Screen, displays tube SID/angle and function buttons. The programmable function buttons can be set for positioning 2-way movement, 3-way and 4-way movement. All movements stop anytime the switch is released. The switch for motorized to manual movement has a button conveniently located on grip.

Single-button positioning:
for 2-way movement of table position and chest area from 1m/1.8m.
3-way movement of chest area from 1m/1.8m and elevating table position. The T-220 table has servo tracking with CMT with vertical travel of 300mm. The table Bucky has servo tracking in longitudinal direction with CMT of 500mm.

4-way movement with motorized tube rotation and angulation servo tracking with the detector.
Manual/motorized (option) vertical; axis (yaw) 360°.

Motorized servo tracking with wall stand S1800 with vertical travel of 1500mm.
X-ray tube rotate tracking with centering of detector.
Longitudinal rail length: 3800mm, travel 2950mm.
Transverse bridge length: 2500mm, travel 1600mm.
System weight: 220 kg,
power requirements: 110/220VAC/50-60Hz/5A.
Telescope carriage size (LxWxH)713x620x980mm.

Application Programming Interface (API): The movement is integrated with acquisition console in 6 different positions. Anatomy select can be activated on the study menu. The movement is automatically engaged with one press on the hand switch the final study position. Tomosynthesis (volume DR) (optional).

Other AADCO DR Systems
with CPI Generators & CsI FP wired and wireless are available.
AADCO Imaging Tables

AADCO's Mobile Four Motion Dual Post Imaging Table
Designed and built with C-arm Fluoroscopy in mind, the AADCO T-3500 4 Motion / Dual Post Imaging Table caters to your needs. It features up/down vertical movement, with independent post adjustment to provide a head elevated tilt and head down Trendelenburg Position. Its 4 caster base moves easily, and is mobile with locking casters. The AADCO T-3500 is an excellent choice for your hospital, clinic or office practice. Excellent for C-arm and various Digital Radiographic uses.

Features & Specifications:
- Radiolucent Top 66.5" (169cm) imaging space
- Top Dimensions 25.5" x 78.75" (64.7cm x 199.3cm)
- Motion 1 Height Range 26.25" x 42" (66.7cm x 106.6cm)
- Trendelenburg tilt +/- 14 degrees

AADCO's Fixed Height Imaging Table
Our T-001 fixed height table is easy to move into various positions, and secure on four locking casters, ensuring your target stays in place. The T-001 is an economical choice for your hospital, practice or office. Good for C-arm and various Digital Radiographic uses. Mobile patient table with laminated radiolucent top, locking casters on front wheels. Large wheels enable easy maneuverability of the table for accurate positioning.
Catalog # T-001 $2,300

AADCO's T-300 4-way Float Top Imaging Table with Radiolucent Top
Battery Operated & Mobile
4-way float-top, 82.6 x 31.5 Imaging table, that is battery operated for a full workdays use (8 hours) on one battery charge.
Catalog # T-300 $9,973

Features & Specifications:
- 270kg. (594 lbs.) evenly distributed weight load capacity
- Table Dimensions: Width: 31.5" Length: 82.6" in Length
- longitudinal travel 31.5" (800mm)
- Transverse Travel 11.8" (300mm)
- locking casters on front wheels
- Warranty - 1 years parts
- Table Weight: Capacity 286 lbs (130kg)

AADCO's Adjustable Height Diving Board Imaging Table

Designed and built with C-arm Fluoroscopy in mind, the AADCO T-6550 Height adjustability brings the working surface to a more ergonomic position. Easy to move and secure with four locking casters. Adjustable Height Diving Board Style Imaging Table provides Functional Versatility at an Outstanding Price. Catalog # T-6550  $7,550

Features & Specifications:
- Radiolucent Top - 51 in. (130.5 cm) imaging space
- Top Dimensions - 23.5 X 75 in. (59.6cm x 190.5cm)
- Motion 1 Electric- Height Range 28 in. - 37 in. (66-102cm)
- Controls - Multi-pedal foot controller
- Weight Capacity 330 lbs. (150 Kg)
- Includes - 1.5 in. (3.8cm) Radiolucent PolyFoam™ table top pad, 3 in. (10cm) locking casters

Warranty - 1 year parts

AADCO's Four Motion Dual Post Imaging Table with Float Top

Designed and built with C-arm Fluoroscopy in mind, the AADCO T-1950 4 Motion / Dual Post Imaging Table caters to your needs. Float-top Table with Head to Foot Travel with up/down vertical movement, posts adjust independently to provide a head elevated and Trendelenburg Position. This table with a 4 caster base is mobile and adjustable to many positions. Various movement locks make sure your target stays in place. The AADCO T-1950 is an excellent choice for your hospital, practice or office. Excellent for C-arm and various Digital Radiographic uses. Catalog # T-1950  $7,550

Features & Specifications:
- Patient Weight Capacity: 450 lbs (205kg )
- Table Dimensions: Width: 27.5 in Length: 78.75 in Width: 590 mm Length: 2000mm
- Motion 1: Height Range 33.5" - 45" or 850mm - 1000mm
- Motion 2: Head Up/Low Fowlers Position
- Motion 3: Trendelenburg Tilt ±14°
- Motion 4: Longitudinal 18" or 200mm
- Controls: 1 foot control
- Warranty - 2 years parts

AADCO Medical’s Hercules Suspension Systems are the new standard in quality, durability and flexibility. Our Overhead Suspension Systems meet the needs and rigors of all of today’s Diagnostic & Interventional Lab Environments, including MRI-Safe® systems specially designed to operate safely in MRI environments tested to 3 Tesla.

Hercules Systems are precision machined, high strength, aircraft grade aluminum alloy that is stronger than steel of equal weight. There are no cold welds, cheaply stamped parts or weak points to fail, in our UL validated and certified Hercules systems.

Hercules Medium Duty Arms handle loads up to 21 kg (46 lbs). Available as either single or dual mount column for wall or ceiling.

Our medium lifter arm is available with internal wiring for powering examination and surgical lamps, and other medium weight devices.

Multiple Hercules® columns can be mounted on one ceiling track or individually fixed mounted. Custom track lengths are available to suit a wide variety of needs. Systems are available in either conventional or MRI-Safe® Models.

The only MRI-Safe® Equipment Suspensions available anywhere.

Available with Dual & Single Mount Columns, Medium & Heavy Duty Equipment Suspensions

Single Mount Column with 360 Degree Rotation
Shown with two separate columns mounted on one track, carrying one device each: a Procedure Lamp & Dual mount LCD.

Dual Mount 270 degree Rotation. Holds up to 2 Devices
shown with two arms & optional Procedure Lamp & X-ray Barrier.

Nationwide Sales, Installation & Service 1-800-225-9014 www.aadcomed.com
**Why Some Overhead Suspensions Fail**

As shown on the FDA Website, failures of German Manufactured Overhead Systems in the USA alone, have totaled many thousands of units...

Such failures, are due to cheap stamped metal parts.

Fatigued cold welds, connecting those metal parts & poorly engineered mount and connection points

Above- Spring Arm with broken weld, after breaking off equipment mount.

German manufactured overhead systems have had thousands of failures and incidents causing equipment damage, excessive lab down time and the high risk of user and patient injuries.

Close up of broken part after weld failure.

Equipment mount fractured at key slot.

Closer view of broken weld points and separated equipment mount.

**Why Hercules® Suspensions Systems are Durable**

**BETTER DESIGN, MATERIALS & ENGINEERING, MAKES THE BEST SUSPENSION SYSTEM**

**HERCULES® IS DESIGNED, ENGINEERED, ASSEMBLED AND QUALITY CONTROLLED IN THE USA**

AADCO designed and engineered Hercules® Suspension Systems to solve this problem. Our American designed and engineered mono-block construction, made with high-grade USA aerospace materials, are light in weight and Heavy Duty in durability and performance. We’ve eliminated the weak points with an Innovative American Solution.

Above: Close up views of Hercules® Mono-Block construction attached at its pivot joint with a solid 6063 hardened aluminum extrusion.

**Nationwide Sales, Installation & Service** 1-800-225-9014 www.aadcomed.com
AADCO's Lead Acrylic Barriers are available in a choice of 60cm. x 80cm. wide (23.6" x 31.5"), 60cm. x 50cm. wide (24"x20"), or 40cm. x 50cm. wide (16"x20"), with lead acrylic windows of 0.5 mm and 1.0mm lead equivalence. The 60cm. x 80cm. wide (23.6"x31.5") and 60cm. x 50cm. wide (23.6"x20") models are offered with or without a torso contour cutout (shown in photos). All sizes are supplied with a single suspension arm for a single device and the specified Barrier. All systems come with either a single mount ceiling column that allows 360 degree rotation, or a dual device mount ceiling column that allows 270 degree rotation and the mounting of a second shield, surgical lamp, or other device such as a pressure injector or video monitor. A single device wall mount is also available. A 2.5 meter long track system that will accommodate either the dual or single ceiling mounts is also available. Shown with optional LED Lamp.

Installation Available in the contiguous United States. Travel Charges may apply, depending on location. Please Call for Quotation 1-800-225-9014
RayShield® Center Mounted Overhead X-ray Barrier Packages

Center Mounted X-ray Barriers with their ball and socket mount can rotate 360 degrees, allowing them to be turned horizontally, vertically, or at any angle, making them very versatile. They are available with or without a torso placement contour cutout in three sizes; 76cm. high x 61cm. (30”x24”), 60 cm. x 50cm. (24”x20”) and 50cm. x 40cm. (20”x16”). All systems come with either a single mount ceiling column, that allows 360 degree rotation, or a dual device mount ceiling column that allows 270 degree rotation and the mounting of a second shield, surgical lamp, or other device such as a pressure injector or video monitor. A single device wall mount is also available. A 2.5 meter long track system that will accommodate either the dual or single ceiling mounts is also available. Except where otherwise indicated, all barriers shown are 0.5mm lead equivalent. Tracks & LED Lamps are optional.

All Items Shown at List Prices for conventional models

76x 61 cm. Center Mounted Barrier with Contoured Cutout
OS-596 dual mount column $10,595
OS-596R single mount column $10,210

60x 50 cm. Center Mounted Barrier with Contoured Cutout
OS-765 dual mount column $10,595
OS-765R single mount column $10,210

50x 40 cm. Center Mounted Barrier
OS-745 dual mount column $8,328

Limited Warranty

AADCO Medical, Inc, warrants the Barrier & Equipment Suspension Systems manufactured by AADCO Medical, Inc. to be free of defects in material and workmanship for one year from the date of purchase of the product. Repair or replacement of equipment parts will be done at the sole discretion of AADCO Medical, Inc, upon a no-charge basis and subject only to normal shipping and handling charges. This warranty only includes parts replacement and/or factory service assumes normal wear and tear and does not cover any product which, at the sole discretion of AADCO Medical, Inc, has been improperly installed, abused or misused. This warranty represents the only warranty provided by AADCO Medical, Inc, for these products. AADCO Medical, Inc., assumes no liability other than that expressly set forth in the foregoing warranty. No other warranty, whether express or implied, is provided. In no case shall the liability of AADCO Medical, Inc., exceed the purchase or replacement price of the product.

**Standard System Weights**

Single Medium Lifting Arm Configuration <65 lbs.

Dual Medium Lifting Arm Configuration, 2 Medium Lifting Arms & Column <90 lbs.

Optional Ceiling Track Weight <85 lbs.

**Total System Load Capacity**

Single Medium Lifting Arm: for loads up to 21 Kg (46 lbs).

Dual Medium Arm Configuration: Two Medium Lifting Arms Counterbalance Weight per arm: 21 Kg (46 lbs). Total maximum counterbalance weight 42 Kg (92 lbs).

**Individual Arm Counterbalance Capacity**

Medium Lifting Arm: for Loads up to 21 Kg (46 lbs).

Dual Medium Arm Configuration, Two Medium Lifting Arms Counterbalance weight per arm: up to 21 Kg (46 lbs). Total maximum counterbalance weight 42 Kg (92 lbs).

US Patent 7,250,761 B1
**Hercules® Medium Duty Lifters & Optional Equipment**

These mounts are engineered to be ultra-lightweight, so that Single and Dual Mount Models may be hung on traditional overhead systems, that normally carry X-ray Barriers, Injectors and small procedure lamps. There are also special MRI-Safe® versions of our LCD mounts that are designed specifically for our exclusive MRI-Safe® Overhead Suspension Systems. Our Single and Dual Mount MRI-Safe® Overhead Systems, accommodate the single and double LCD mounts.

**Injector Mounts for all Overhead Systems**

Designed to accommodate Liebel/Tyco or Nemoto Injectors. Specify the injector manufacturer and model number when ordering.

Injector Mount OSP-770

**MRI-Safe® Injector Mount**

OSP-770NF MRI-Safe® Injector Mount

*Call For Quotation*

**J-Bow Style Injector Mounts**

Designed with an offset bend will accommodate Liebel/Tyco or Nemoto Injectors. Specify the injector manufacturer and model number when ordering.

OSP-780 J-bow Injector Mount

**ErgoLite® LED Examination & Procedure Lamps**

The ErgoLite® Lamp runs on 24VDC from a AC 110-120V or 230-240V power supply and offers infinite focus with a light intensity of 75,000 Lux LED. Lamp Head: 19cm. in diameter. Infinite focus illuminated field size: 14 to 25cm depending on subject to lamp distance. Lamp includes a removable, sterilizable handle.

OSP-511LX ErgoLite® LED only with external 100 to 240VAC 50/60HZ Power Supply $4,302

Available MRI-Safe®

OSP-511LXNF MRI-Safe® ErgoLite® only with external 100 to 240VAC 50/60HZ Power Supply $7,808

Caution: Remote Power Supply for MRI-Safe® Lamp is magnetic, but supplied in an RF Shielded Box, and must be located outside the 100 Guass Line.

**Medium Duty Ceiling Track**

Our Easy-Glide™ Track can be used with our Single and Dual Mount Suspension Systems. The track has an overall length of 2.5 meters (98.5") and comes equipped with one carriage that handles one ceiling mount column. A second carriage may be added and a drift resistant carriage kit which holds the carriage in position, often desirable when using angio injectors, can be ordered installed, or added later.

AADCO’s Hercules MRI-Safe® Heavy Lifter Equipment Suspension Systems

Our Equipment Suspension Systems are available for either MRI-Safe® Environments tested to 3 Tesla, or Conventional Hercules® Models. Both share outstanding strength and durability. They are practically Bulletproof. Our Systems include a 360 degree rotation Central Axis Column (may be wiring limited) for ceiling Attachment, and combinations of counterpoised arms as listed below in both Conventional and MRI-Safe® models. Hercules offers up to two heavy duty arms, for loads up to 99 lbs; OSP-11 with no wiring, or OSP-12 arms with a continuous wiring chase for pressure injector wiring, LCD monitors and other applications. Some systems include 1 Medium Duty arm, with or without electrical wiring for loads up to 46 lbs.

### Specifications & Dimensions

#### Overall

| Overall Heavy Lifting arm Reach 68 inches |
| Overall Medium Lifting arm Reach 62 inches |
| Standard Column Height 28.38 inches |
| Other Dimensions, See Diagram right. |

#### Standard System Weights

- Single Medium Lifting arm configuration: 85 lbs. Single Heavy Lifting arm configuration: 100 lbs.
- Dual Arm Configuration: 1 Medium Lifting & 1 Heavy Lifting Arm: 115 lbs.
- Triple Arm Configuration: 1 Medium Lifting & 2 Heavy Lifting arms: 145 lbs.

#### Total System Load Capacity

| Single Medium lifting Arm | for loads up to 21 Kg (46 lbs). | Medium Single Heavy lifting Arm configuration: 99 lbs. |
| Dual Arm Configuration: 1 Medium Lifting & 1 Heavy Lifting Arm: 145 lbs. | Triple Arm Configuration: 1 Medium Lifting & 2 Heavy Lifting Arms: 244 lbs. |

#### Individual Arm Counterbalance Capacity

| Heavy Lifting Arm up to 99 lbs. |
| Heavy Lifting Arm with large wiring channel up to 98 lbs. |
| Medium Lifting Arm for loads up to 21 Kg(46 lbs). |

Nationwide Sales, Installation & Service   1-800-225-9014   www.aadcomed.com
Our Equipment Suspension Systems are available for either MRI-Safe® Environments tested to 3 Tesla, or Conventional Hercules® Models. Both share outstanding strength and durability. They are practically Bulletproof. Our Heavy Lifter Hercules Suspension System is a new standard in durability & flexibility that meets the needs of all of today’s Diagnostic & Interventional lab environments, as well as MRI Environments.

Each Heavy Lifter Hercules Counterpoised Arm (OSP-11 & OSP-12) has a dynamic load lifting range that is adjustable from 4 to 45 kg, (8.8 to 99 lbs); That’s delicate enough to handle a Procedure Lamp, and durable enough to lift a 3 over 3 LCD array.

Hercules Heavy Lifters are precision machined from high strength aircraft grade aluminum alloy that is stronger than steel of equal weight and utilizes stainless steel at critical articulation and wear points. There are no cold welds or weak points to fail in our UL validated and certified Hercules Systems.

Hercules Systems may be configured with one or two Heavy Lifting Arms (up to 45 Kg. or 99 lbs.), and one Hercules Medium Lifter Arm (up to 21 Kg. or 46 lbs.). The Medium Lifter is designed with internal wiring for powering examination and surgical lamps, and other lightweight devices, and allows for a total of 3 counterpoised lifting arms all capable of rotating 360 degrees around a central axis.

Our OS-12 Articulating Arm provides a large internal wiring chase, traveling from device to ceiling, for entirely concealed wiring (see photo left & illustration of wiring path, in Red). The wiring chase provides easy access, so wiring may be done for any device in the field at the time of installation, or later. The chase in the suspension arm is 2.25 inches wide by 0.75 inches high, allowing for a variety of internal cabling needs.

Hercules Systems can be fixed mounted in one ceiling location, or track mounted. Two track sizes are available depending on overall load. Custom track lengths are available to suit a wide variety of needs. Available in both Conventional and MRI-Safe® Models.
AADCO’s Hercules MRI-Safe® Equipment Suspension Systems

Our Equipment Suspension Systems are available for either MRI-Safe® Environments up to 3 Tesla, or Conventional. Our Heavy Duty Lifting arms are in most instances required for Triple and Quad LCD Arrays require our Hercules™ Suspension System available either as a single overhead arm, or mounted on our Central Axis Stacked Column System. Quad and Triple Arrays have the same flexibility with individual LCD mounts that can be tilted, rotated and pivoted independently from other LCDs.

These Overhead LCD Mounts have been developed for maximum flexibility. On all models each array can be rotated 360 degrees. On external wired models the individual LCD mount can be tilted and pivoted independently from other LCDs. On Internal wired and MRI-Safe® Models the LCD’s can be tilted in a limited range.

AADCO's Hercules MRI-Safe® Equipment Suspension Systems

AADCO's Exclusive RayShield® Neuro-Shield

Our Equipment Suspension Systems are available for either MRI-Safe® Environments tested to 3 Tesla, or Conventional Hercules® Models. Both share outstanding strength and durability. "They are practically Bulletproof."

This RayShield® Lead Acrylic Barrier is carried by our Hercules® Heavy Lifter Suspension. It is designed specifically for Neuro-Radiology. It includes a 128 by 80 cm (48" wide by 30" high) 0.5mm lead equivalent clear acrylic barrier, with a contoured cut-out to accommodate placement at the head/shoulder area. The lead acrylic barrier is fitted with a 0.5 mm lead equivalent flexible vinyl shield that allows shielding conformance to a variety of contours.

Barrier movement is both smooth and precise. Handles at both rotational joints along the horizontal axis allow for one handed operation to tilt the RayShield® Acrylic Barrier to any angle.

The reinforced aluminum frame that carries the lead acrylic rotates a full 360 degrees. The internally counterbalanced Hercules® provides for a full range of movement and the specially designed 2.5 meter track allows the system to be easily maneuvered into its operating position or parked out of the way.

This system offers outstanding ergonomics of use and flexibility to meet the needs of any lab. Custom Lead Acrylic Barrier and flexible lead rubber shield configurations are also available.

OS-8128  Neuro Shield System without track or Procedure Lamp.
OSP-270  Wide Track for total loads up to 204 Kg. (450 lbs.). Length 2.5 Meters
OSL-3500 Series LED Surgical Lighting System
with Adjustable Color Temperature

OSL-3500 LED Series lighting technology offers cutting edge performance with precise, uniform, homogeneous lighting both on the surface as well as for deep cavity procedures thanks to innovative shadow control.

**Durable** - Almost unlimited LED life expectancy from the IES LM-80-2008 standard delivers tremendous product reliability and investment protection. **Efficient** - Environmentally sensitive low power consumption and durable LEDs minimize environmental impact. **Optimized Shadow Management** - AADCO has harnessed the far-reaching potential of the multi-lens matrix to virtually eliminate shadows. The OSL-3500 series has overlapping light fields (shown right) with multiple patterns which are selectable based on the procedure situation. These patterns minimize shadows and allow for a more customized light intensity at the procedure site (shown right). **Sterile Operational Control** - The OSL-3500 series provides sterile control, which enables the procedure team to operate all important functions intuitively, quickly and easily, including on/off, dimmer control and shadow management (shown right). **Improved Air Flow** - Modular Design allows improved air flow for a cooler and more hygienic environment (shown right).

**Five models available, include Overhead Suspensions**

- **OSL-3535**: includes one triple head 130,000 Lux LED, OSPL-3 and one 5 head 160,000 Lux LED OSPL-5, $41,355
- **OSL-3533**: includes two triple head 130,000 Lux LED OSPL-3, $33,664
- **OSL-3555**: includes two 5 head 160,000 Lux LED OSPL-5, $49,045

OSPL-5 and OSPL-3 LED Surgical Lamps

Our OSL-5 and OSL-3 LED Lamps provide high quality LED procedure lighting with adjustable color temperature. Our LED’s meet IES LM-80-2008 standards providing high intensity lighting and proper color rendition. The OSL-5 offers a light intensity of 160,000 Lux, and OSL 3 offers 130,000 Lux, both at 1 meter distance.

**OSPL-5 Specifications:**
- Light intensity at 1 meter (Lux): >160,000Lux.
- Color temperature adjustment: 3500K/4000K/4500K/5000K
- Spot diameter: 200-350(mm)
- Color Rendering index: ≥96
- Total irradiance: 510W/m²
- Service life of illuminant: 30,000 h
- Six-dimensional joint: 360 degrees

**OSPL-3 Specifications:**
- Light intensity at 1 meter (Lux): >130,000Lux.
- Color temperature adjustment: 3500K/4000K/4500K/5000K
- Spot diameter: 200-350(mm)
- Color Rendering index: ≥96
- Total irradiance: 460W/m²
- Service life of illuminant: 30,000 h
- Six-dimensional joint: 360 degrees

**OSL-3MBP LED Mobile Procedure Lamp with Rechargeable Battery Pack**

Our Mobile Procedure Lamp is a 130,000 Lux LED Model. It is equipped with an advanced battery pack, allowing it to operate, when fully charged, for up to 8 hours. This LED lamp is state of the art, using the latest advances in lighting technologies while only using 30% consumption of power to produce a very powerful 130,000 Lux at 1 meter. The lamp can be operated, focused, tilted and rotated 180 degrees with one hand.

All Mobile Stands move easily on 4 casters. Their counterpoised arms are internally counterbalanced providing 45 degrees upward and downward motion, as well as 30 degree rotation independent of the stand. At the highest position, the maximum distance from the lamp face to the floor is a very robust 96 inches.

**OSL-3MBP & OSPL-3MBPNF Specifications:**
- Light intensity at 1 meter (Lux): >130,000Lux.
- Color temperature adjustment: 3500K/4000K/4500K/5000K
- Spot diameter: 200-350(mm)
- Color Rendering index: ≥96
- Total irradiance: 460W/m²
- Service life of illuminant: 30,000 h
- Six-dimensional joint: 360 degrees

**Battery Pack & Charger/ Power Supply**
- Battery Type: Sealed Cell
- Battery Box: No maintenance, UL Listed
- Battery Charger/Power Supply: UL Rated
- Auto Sensing: 110 to 240AC 50Hz/60Hz
- Power Input: 24VDC @ 5 amps

**Mobile Stand**
- Mast Height: <61”
- Overall height with arm raised: <87”
- Base Width: <28”
- Base depth: <28”
- Base Height to tops of legs: <6.5”

MRI-Safe® LED Mobile Procedure Lamp with Rechargeable Battery Pack

Our Mobile MRI-Safe® Surgical Lamp has the same robust specifications as our conventional LED mobile Surgical lamp. It is equipped with an advanced battery pack allowing it to operate, when fully charged, for up to 8 hours. Our LED lamp is state of the art, using the latest advances in lighting technologies while only using 50% consumption of power to produce a very powerful 130,000 Lux at 1 meter. The lamp can be operated, focused, tilted and rotated 180 degrees with one hand. All Mobile Stands move easily on 4 casters. Their counterpoised arms are internally counterbalanced providing 45 degree upward and downward motion, as well as 30 degree rotation independent of the stand. At the highest position the maximum distance from the lamp face to the floor is a very robust 96 inches.

Item # OSL-3MBPNF  Built to Order

Caution: the 2 Remote Chargers for MRI-Safe® Mobile Lamp are magnetic, and must be plugged in at a location outside the MRI Shielded Area.
MRI-Safe® LED Exam & Procedure Lamps

Mobile LED Exam & Procedure Lamps are LED Models equipped with an advanced battery pack allowing them to operate, when fully charged for up to 8 hours. Our LED lamp is state of the art, using the latest advances in lighting technologies while only using 50% consumption of power, when compared with halogen lamps, for a very powerful 75,000 Lux at 1 meter with adjustable light intensity and infinite focus. The lamp heads are sealed, and can be operated, tilted and rotated 360 degrees with one hand.

All Mobile Stands move easily on 4 casters. Their counterpoised arms are internally counterbalanced providing 45 degree upward and downward motion, as well as 30 degree rotation independent of the stand.

Conventional Model with Battery Pack & Charger OnBoard

Caution: For MRI-Safe® model, the remote recharger is magnetic. It plugs into 110-120VAC standard wall outlet, which must be located outside the MR shielded area.

Nationwide Sales, Installation & Service 1-800-225-9014 www.aadcomed.com
**MRI-Safe® Retrofit Pole Mount**

A device built specifically for MRI & CT Gantry use, our Pole Mounted Counter-Poised Equipment Suspension provides outstanding reach and versatility of use in MRI & CT Labs.

Simplicity of installation allows this device to be installed without interference with, or penetration of, the Faraday RF Shield in MR Labs. Cementing a small piece of plywood to that shield above the drop ceiling provides minimal required support, with most weight being transferred to the floor.

The pole may be placed as shown, directly beside the MRI Gantry, allowing excellent injector placement and storage. Manufactured entirely of Non-Ferrous materials, our MRI Counter-Poised Stand is non-magnetic to 3 Tesla. In addition to providing a near ideal mounting platform for Pressure Injectors, this Equipment Suspension is versatile and can potentially be used to mount a variety of other devices.

**Product Pricing**

- **OSP-740NF** - MRI-Safe® Pole Mount for MRI w/o arm: $5,669
- **OSP-740NFWA** - WITH MRI-SAFE® DUAL MOUNT ARM: $10,247
- **OSP-740** - Conventional Pole Mount for CT w/o arm: $4,302
- **OSP-740WA** - WITH CONVENTIONAL DUAL MOUNT ARM: $6,532

**Additional Information**

- **Hercules® Super Heavy Duty Lifters**
  - Custom Built for your specific needs and capable of loads up to 200 lbs, this Super Heavy Duty Lifter can easily support a 60 inch flat screen display or multiple smaller Flat Panel displays. It can also be easily retrofitted to existing ceiling tracks that are rated for loads of 300 lbs or more. Our Super-Lifter has 350° horizontal rotation and 45° vertical movement of the Spring Arm. The base mount point of the Spring arm also allows 350° rotation.
  - The display mount also allows up to 15° vertical tilt of the display. Available for both Track and Fixed Mounting. (Not Available MRI-Safe®)

**Product Pricing**

- **OS-80** - Hercules Super Duty Lifter: $18,800
- **OSP-999T** - Custom Trolley for existing track, price per specifications. $7,708
- **OSP-270** - Track & Trolley $7,708

RayShield® Acrylic X-ray Barriers, Conventional & MRI-Safe®

Fixed Height RayShield® Acrylic Mobile X-ray Barriers solve a variety of X-ray Protection problems while offering a wide field of view and excellent X-ray body protection. Seven sizes of barriers are available. Each is designed with an optically clear viewing area made of shatter resistant durable 0.5mm lead equivalent acrylic. Framework is brush finished, highly durable 6061 Aluminum Frame. With no paint to chip, these barriers maintain their like new appearance for many years. Opaque Panel is highly durable kydex material. Casters are medical grade. Foot operated caster locks allow for fixing barrier position. Lifetime Warranty on defects in materials and workmanship. Mobile Barriers are available in conventional and MRI-Safe® constructions listed below.

AADCO’s RayShield® Safety Acrylic (Not Glass) Barriers

Nationwide Sales, Installation & Service 1-800-225-9014 www.aadcomed.com
AADCO's RayShield® Safety Acrylic (Not Glass) Barriers

**RayShield® Upright Interventional Barrier**
Our Upright Interventional X-ray Barrier allows you to work comfortably in a variety of positions, in a standing position. Our RayShield® Clear Lead Acrylic Barrier is shaped to allow your hands and forearms to be placed comfortably on the patient's side of the barrier, allowing you to work comfortably, while with the added protection of a 0.5mm lead equivalent X-ray Barrier. The barrier is mobile and moves easily. It may also be locked in position with its locking casters.
The clear lead acrylic barrier measures 76 cm. wide by 60 cm. high (30''x24''). The opaque section of the barrier is 0.8mm lead equivalence.

**Made with Shatterproof RayShield® Acrylic, Not Glass**

**RayShield® Seated Interventional Barrier**
Our Seated Interventional X-ray Barrier allows you to work comfortably in a variety of positions, while standing or sitting. The combination of a flexible lead rubber shield covering your feet and lower body and a tilting clear lead acrylic barrier that is shaped to allow your hands and forearms to be placed comfortably on the patient's side of the barrier, allow you to work comfortably, while maintaining 0.5mm lead equivalent X-ray protection. The barrier is mobile and moves easily. It may also be locked in position with its locking casters.
The RayShield® Acrylic Barrier may be rotated vertically 360 degrees and has a flexible velcro attached lead rubber shield that is 14 inches wide. The clear lead acrylic barrier measures 80 cm. wide by 60 cm. high (23.6''x31.5'') less the cutout areas. The lower lead vinyl shield is 65 cm. wide by 89 cm. high.

RayShield® Adjust-A-Height™ Barrier

This unique mobile barrier allows adjustment of the clear RayShield® Acrylic viewing area height to any level between 45-1/2" & 68" with ease, due to its internally counterbalanced mechanism. The overall width of the base is 31" and offers 1mm Pb equivalent protection. The upper 28" wide panel is made from 0.5mm lead equivalent RayShield® Acrylic. This strong, yet lightweight barrier is extremely versatile and convenient to use. 7" legs and casters are arranged to create easy access from the preferred side. Storage of barrier is extremely convenient.

Catalog # S-610 $6,793

RayShield® Porta-Shield™

Our PortaShield™ is a versatile mobile protective shield featuring an adjustable height 18" X 24" nylon covered lead vinyl curtain in 0.5 mm Pb equivalent. Very useful in helping to shield areas of a patient's body during some radiographic procedures, or the practitioner during special radiographic or fluoroscopic procedures. Features heavy duty five caster base, anodized aluminum supports, and positive lock for height adjustment.

AADCOS RayShield® Barriers and Shields

RayShield® "Leaded Safety-Film Glass" Mobile X-ray Barriers
Our Shatter Resistant Safety-Film Glass Panels have a special plastic film on the outside of the clear lead glass. The result is a safer product, with clear lead glass panel that will resist shattering due to impact and provide greater safety, that other lead glass barrier manufacturers won't match. This is an AADCO Exclusive Innovative Product.

Our Barriers solve a variety of X-ray Protection problems while offering a wide field of view and excellent X-ray body protection. Six sizes of barriores are available in 2.0mm lead equivalence, a brush finished, highly durable 6061 anodized aluminum frame, and supporting brackets and hardware of stainless steel. With no paint to chip, these barriers maintain their like new appearance for many years. Opaque Panel is highly durable kydex material. Casters are medical grade. Foot operated caster locks allow for fixing barrier position. Lifetime Warranty on defects in materials and workmanship.

RayShield® Adjust-A-Height™ Pivoting Over-Table Barrier

When an overhead barrier is impractical, this cantilevered design can wheel into position, extending over the table to provide necessary protection from fluoroscopic X-ray exposure. The barrier mount provides 360 degree rotation along both vertical and horizontal planes, allowing barrier movement into a large number of working positions. Semi-circular cutout is contoured to fit closely to the patient’s torso for maximized shielding from X-ray exposure. The 6 inch offset pivot position helps provide a maximum extension of 36 inches. The barrier is of 0.5mm lead equivalent, clear RayShield® Acrylic that is 24 inches wide x 24 inches high. The barrier height is adjustable from 63 inches above floor to 30 inches at center.

AADCO’s RayShield® Barriers and Shields

RayShield® SideWinder
(Table Side-rail Mounted)
When there is no overhead barrier or where an overhead barrier is impractical, this design, which attaches directly to the table accessory siderail, can be a great radiation protection solution. The barrier mount provides 360 degree rotation along the vertical and horizontal planes, providing any amount of barrier tilt needed and allowing the barrier to be placed in a large number of working positions. The barrier can be placed anywhere along the tables accessory rail. The barrier is of 0.5mm lead equivalent clear acrylic. Choose from Standard or Extended Model, with 10” added extension arm that allows for greater height above the tabletop. There are four configurations of the lead acrylic shield, with or without hand placement cutouts.

SideWinder™ Portrait
12”Wx16”H lead acrylic
S-635P Standard $3,423
S-640P Extended $4,098

SideWinder™ w Arm Cutouts
20”Wx16”H lead acrylic
S-635HC Standard $4,281
S-640HC Extended $4,599

RayShield® Intensi-Barrier™
(Image Intensifier Mounted)
When there is no overhead barrier or where an overhead barrier is impractical, this design, which attaches directly to the Image intensifier, can be a great radiation protection solution. The barrier mount provides 360 degree rotation along the vertical plane and approximately 20 degrees of tilt, allowing the barrier to be placed in a large number of working positions. The barrier is of 0.5mm lead equivalent clear RayShield® Acrylic in 3 configurations, with or without hand placement cutouts.

AADCO's RayShield® Barriers and Shields

**Double Pivot Shields**
Available in two different sizes. Each is equipped with a 17cm wide mounting bracket which can slide and lock onto table side accessory rails up to 28.5mm high by 8.8mm deep. Flexible 0.5mm lead equivalent overlapping curtains are attached to an aluminum alloy pivot arm that is double jointed and can pivot at two points in order to conform to the shape of many tables. The entire pivot arm can create a side wing up to 32" wide. Our exclusive Dual Lock™ Mount system makes leveling shields on any conventional size accessory rail easy and secure. A removable 24" wide top Shield (9" high) may be easily fitted on top or lifted away for patient transfer.

**Three Piece Under Table Shield**
80cm (32") Cat. # S-404
- 32" wide x 28" below the attachment arm
- Removable 60cm (24") wide Top 9" high
- Provides a side wing of up to 32" wide
- Dual locking handles for better mounting adjustment

**Double Pivot Shield w Position Locks**
It has the same specifications as our S-405 shield (above), but it’s specifically designed for fluoroscopic tables that tilt side to side. This shield not only conforms to the contoured cut of the tabletop, but also locks in place, retaining the shield position when the table is tilted into almost any position. S-407 shield size 102cm (40") wide x 28" below the attachment arm.

**Four Piece Under Table Shield**
102cm. (40") Cat. # S-405
- 102cm (40") wide x 28" below the attachment arm
- 24" wide Top 9" high
- Provides a side wing of up to 32" wide
- Dual Locking Handles for better mounting adjustment

**Price** $4,536

**S-405 shown without Lift-off Above Table Shield Section to demonstrate double pivot of S-405, S-404 and S-407 Shields.**

Nationwide Sales, Installation & Service 1-800-225-9014 www.aadcomed.com
A variation on undertable protection, this single pivot shield offers a single protective wing on the pivoting arm only. Shield is 60cm. (24") wide by 71cm. (28") high with a 60cm. (24") wide by 9" high removable top panel.

S-403  $3,071

On Sale Now
S-403 $2,610.
sale ends 7/31/19

This Non-Pivoting Shield offers a 90cm. wide (35.4") by 71cm. (28") high. This S-321 offers a handleless design, no pivot joint and a protective metal bar that fastens the protective rubber shield to the framework. These features provide a high level of durability. The adjustment handles are replaced by 2 recessed Allen Head Fasteners and an attached wrench. The 7 panel design allows a C-Arm to be positioned through the shield.

S-321  $3,519

With no pivot, a reinforced aluminum plate that clamps the lead rubber shield to the metal frame, and no handles to get caught on or damaged, this shield is extremely durable.

Reversible Double Pivot Shield

Specifically designed to fit either the left or right side of a table, the Reversible Double Pivot Shield easily reverses without tools in about 60 seconds. This shield has 3 lift off panels that are easily removed from the frame. The frame can flip over and slide onto the accessory rail on the other side of the table and shield panels may then drop back into position. This shield not only conforms to the contoured cut of the tabletop, but also reverses easily to fit either side.

S-408 shield size 80cm (32") wide x 28" below the attachment arm.

AADCO's RayShield® Barriers and Shields

RayShield® Dual-Lock Under-Table X-ray Shields
Primarily designed to prevent lower body exposure to scattered radiation, these units are a great addition any table where X-ray fluoroscopy is used. Our exclusive Dual Lock™ Mount system makes leveling shields on any conventional size accessory rail, easy and secure, (up to 28.5mm High by 8.8mm deep).

**Single Pivot Shields**

Our Single Pivot Shields are 90cm. wide (35.4") with an articulating 40cm. (16") side wing that can be used to conform to the tabletop or provide either left or right side protection. A removable 40cm. (16") wide top shield 9" high may be easily fitted on top or lifted away for patient transfer. S-311A offers a single protective panel, S-314A offers a 7 panel design which allows a C-Arm to be positioned through it.

S-311A Single Panel
S-314A 7 Panel Design
S-315 Handleless Design

**One Piece Single Pivot Under Table Shield**
S-311A provides a one piece, under table protective panel and comes with a 16" wide lift-off above table protective panel. **S-311A** $3,291

S-311A and S-314A shown without lift-off top panel demonstrates hinge position for pivot movement away from the table to form a protective side wing.

**On Sale Now**
S-311A Regular $3,291

Now $3,145.
sale ends 8/31/19

**Handleless Reinforced Undertable Shield**
The S-315 offers a handleless design. Adjustment handles are replaced by 2 recessed Allen Head Fasteners and an attached wrench with a protective metal bar that fastens the protective rubber shield to the framework. These features provide a high level of durability and make the shield less likely to be damaged by collisions with gurneys and other equipment. The 7 panel design allows a C-Arm to be positioned through the shield. **S-315** $4,204

Why X-Drape®?

X-ray aprons guarantee little, except protection of most major organs. What they don’t protect is the eyes, face, hands, arms, legs and head.

X-Drape® is actually the first line of defense for these critical parts. When correctly used X-Drape® stops most radiation at the source. That is the scattered radiation coming from the patient’s body.

If not stopped from reaching the professionals in the lab, the cumulative effects, from scattered radiation, to the unprotected areas, from hundred or even thousands of procedures, will over time, likely adversely impact their health. This can potentially lead to unexpected damage, disease and even premature death. Especially for those who work closest to the radiation source during procedures.

X-Drape® Rationale

Effectively Reduces Scattered Radiation Exposure up to 98%
Provides Critical Radiation Dose Mitigation for the Eyes, Hands, Arms & Thyroid
Reduces Overall Body Dose
Reduces Radiation Badge Readings

X-Drape® Performance

Based on 12 Biopsy Procedures with and without X-Drape®
Measurements in mR
Expressed in Percentage of Skin Entrance Dose
Left Eye Closer to Radiation Source

X-Drape® Advantages

At 0.25mm lead equivalence it provides greater dose reduction than competitive products
Improves dose reductions well beyond conventional radiation protection methods
Meets ALARA (as low as reasonably achievable) guidelines
Allows physician eye dose to be reduced below ICRP (International Congress on Radiation Protection) recommended maximums

X-Drape® Benefits

Greatly enhanced radiation dose reduction in critical areas of eyes, hands, arms & thyroid
Allows closer proximity to the patient during procedures
Reduces radiation badge readings
Lowest price per unit dose
Lowest dose per procedure

White Paper reports are available upon request.

Ask us about Our X-Drape® Challenge!

X-Drape® offers Superior Performance and Green Disposal, because it contains totally non-toxic attenuation materials. Now we’re offering you the best price too! If you’re using a competitive product you can enjoy all the benefits of X-Drape® at a guaranteed price that is 10% lower than what you’ve been paying. Convert to X-Drape®, take advantage of superior features and SAVE.
Scattered Radiation at the Operator Eye level is in the Range of 62 mR Per Hour!

Radiation Dose readings extrapolated & converted to RADs from Schuller et al, Radiographics 2006

X-Drape® additionally Reduces Dose by an average of 70% and up to 98%

The National & International Conferences on Radiation Protection (ICRP & NCRP) have set recommended standards. "Lens/Eye Dose should be limited to 15 RADs per year (ICRP/NCRP)."

They have also concluded that, “Cataracts occur with cumulative dose between 200 to 500 RADs (ICRP/NCRP).”

Based on an average Lens/Eye Dose of 62 milleRads per hour, shown below and an average of 576 hours of Fluoroscopy per year some clinicians are receiving doses of 35.7 RADs per year.

In a 30 year career this amounts to 1,071 RADs, if the operator is standing upright; far more if crouched or seated (about 5,184 Rads).

An SIR published study has drawn this conclusion, “leaded glasses or scatter shielding drapes substantially reduced lens dose by factors of 9.5 and 12 respectively. Maximal eye shielding was achieved by the use of both leaded glasses and scatter-shielding drapes”

Drs. Dauer & Thorton, Memorial Sloan Kettering Medical Center, Society of Interventional Radiology 2009

X-Drape® It’s about Protecting Your Eyes, Face, Hands, & Arms

**D-110s LeadFree™ 0.25mm Lead Equivalent X-ray Shield**

**Size Does Matter**

Positioning is critical to the effectiveness of a Sterile Radiation Protection Drape. Positioned properly to block scatter radiation coming from the patient’s body, these Sterile Radiation Shields can be highly effective. Positioned improperly they are much less effective, and size is important because larger drapes provide better coverage of the scattered radiation field, absorb a greater amount of scattered radiation coming off the patient’s body and reduce margin for error for critical positioning.

Sterile Field Bags for Many Devices See Page 41
In a paper presented at The Radiological Society of North America (RSNA) in December 2004, specific findings were reported of radiation related eye damage in a group of 59 practicing Interventional Radiologists ranging in age from 29 to 62, who were surveyed and examined. The paper reported; "The researchers found that nearly half of the Interventional Radiologists screened had signs of radiation related lens changes. PSC Cataracts were found in five (8 percent) of the 59 radiologists screened and an additional 22 subjects showed small paracentral dot-like opacities in the PCS region of the lens, which is consistent with early signs of radiation damage."

Interventional Radiation Protection Strategies, including Leaded Glasses yield an approximate dose reduction of 45%. They should be used, but are now considered to not be enough.

A 2009 study has drawn this conclusion, "Leaded glasses or scatter shielding drapes substantially reduced lens dose by factors of 9.5 and 12 respectively. Maximal eye shielding was achieved by the use of both leaded glasses and scatter-shielding drapes."

Drs. Dauer & Thorton, Memorial Sloan Kettering Medical Center, Society of Interventional Radiology 2009

AADCO RayShield® Leaded Glasses & AADCO X-Drape® Sterile X-ray Shields were used in this study.

In a paper presented at The Radiological Society of North America (RSNA) in December 2004, specific findings were reported of radiation related eye damage in a group of 59 practicing Interventional Radiologists ranging in age from 29 to 62, who were surveyed and examined. The paper reported; "The researchers found that nearly half of the Interventional Radiologists screened had signs of radiation related lens changes. PSC Cataracts were found in five (8 percent) of the 59 radiologists screened and an additional 22 subjects showed small paracentral dot-like opacities in the PCS region of the lens, which is consistent with early signs of radiation damage."

RayShield® X-ray Protective Glasses

Our glasses are manufactured in our in-house optical lab to the highest standard in the industry. They offer the superior protection of a highly quality controlled optically-correct lead glass lens. They feature better balance than many other X-ray lead protective eye glasses. Genuine RayShield® X-ray Glasses are the industry’s premium product.

Ordering Prescription Glasses

Prescription orders require the following information included on or with the purchase order: (1) Prescription (2) specific lens type; single vision, standard bifocal or progressive (invisible) bifocal (3) height of bifocal (Note: We will place bifocal height on center unless otherwise specified) (4) Pupillary Distance.

In some cases glasses may need special fitting. This should be done, after receipt, by a qualified optician. When ordering bifocals you may wish to have the bifocal height measured. This should be done with the specific eyeglass frame you’re ordering. Upon receipt of the order we will arrange to send you a frame so that measurements may be made by your local optometrist, optician or ophthalmologist. Note: Prescription orders are not returnable.

Warning

All Glass X-ray Protective Lenses, regardless of manufacturer, present a significant risk of eye injury if the lens is damaged in any way. Plastic and polycarbonate lenses can reduce this risk, but do not, by themselves, provide any protection from X-rays.

RayShield® Dual Protectors X-ray Glasses

An innovation in X-ray Protective Eyewear, our patented AADCO Exclusive design Dual Protector™ provides 4 advantages over conventional X-ray Eyewear. Here’s How It Works:
The Dual Protector™ X-ray Eyeglass is an improved ergonomic and safety design that creates a single containing eyeglass frame into which two lenses may be placed in front of each eye. This frame design allows a non-prescription Lead Glass lens to be placed in front of an ophthalmic plastic lens, thereby placing that lens between the lead glass lens and the eye. This enhances safety by making it less likely that a glass chip or fragment could reach the eye as the result of impact. The plastic lens can now serve as the prescription lens. This causes the overall weight of any prescription lens to be up to 70% lighter.

Available in 4 colors. Simply add the letter indicating the color you want, to the catalog number for the correct item. "S" for Silver, "B" for Blue, "P" for Patina and "K" for Black.

70% lighter than conventional prescription Lead Glass Eyewear. with Far Greater Safety...

OptiSafe™ Disposable Eye Shields

Clean, Economical, Disposable Splash Protection at Your Fingertips

Gloves are replaced between patients - Shouldn't your eye shields be replaced too?

OptiSafe™ protective eyeshields provide clean, economical, disposable eye protection that is readily available to pickup and go from our convenient dispenser box.

OptiSafe™ Features:
• Anti-fog lenses that provide full protection
• Can be worn over prescription glasses
• Light weight and comfortable
• Convenient and economical
• Can be worn with a surgical mask

OptiSafe™ Benefits:
• Disposable eye wear Reduces the risk of cross-contamination when compared to re-usable safety glasses *1
• Eye shields Promotes OSHA compliance *3
• Eye shields are Recommended by NIOSH and CDC
• CDC recommends eye shields in all health care settings and when caring for all patients regardless of infection status *3
• Most blood exposures in health care settings are preventable with proper PPE (personal protective equipment) *4
• Disposable eyewear providing full frontal and lateral coverage are effective in preventing eye splatter *5
• The incidence of eye splatter among health care providers working in nonsurgical areas is more common than previously assumed because of the lack of recognition of splatter (subclinical splatter) by the workers *5
• Prescription glasses are unsuitable for use as the sole source of eye protection from blood splash injury *6
• Blood splash injury can occur without knowledge of the event *6

OptiSafe™ Features:

D-350 Handy-Pack Dispenser Box of 25 Disposable Protective Glasses $36.00/box
D-355 Acrylic Display Dispenser $40.00/each

X-Trak™ Intelligent Mobile, Apron Tracking System

FREE for AADCO Platinum Plus Rewards Customers!

X-Trak™ TRULY makes your job easier ...

X-Trak™

- Enters virtually all your data automatically
- It auto-populates data fields when new AADCO products are scanned
- It Alerts you when testing needs to be done
- It requires no web connection or WiFi
- It’s Compatible with Android smartphones / tablets
- It’s data easily exports to any computer database or spreadsheet
- It does its magic with AADCO barcodes when it Auto-populates data fields, because the data is in every AADCO Barcode.
- There is no software to purchase or maintain
- X-Trak™ will read any Lead Apron Bar Code for basic info.

Now X-ray Protective Apron Tracking is made easy with our Automatic Data Entry, Bar-Coded, Portable, Smart Phone / Tablet based, X-Trak™.

X-Trak™ is a unique intelligent bar code data entry system. X-Trak™ provides automatic data entry of essential apron data. When you scan AADCO’s New Product Bar-Coded Aprons with your Smartphone or Tablet, essential apron data is automatically entered and details populate the X-Trak™ database. As your apron inspections are being performed, records can easily be updated with new information.

Track your X-ray Protective Aprons with ease anywhere in the hospital with your Smartphone or Tablet. If desired, you can export your data to any open database system you choose. Our X-Trak™ system is FREE for AADCO Contract Customers, including FREE Customer Support, during AADCO’s regular business hours.

Ask us about our FREE X-Trak™ Tablet Giveaway for Qualifying Customers!

ComfortLite™ X-ray Protective Aprons

Simply the Best Combination of Protection, Durability & Comfortable feel & fit...

Our customers asked and we listened. They told us about the features they most desired in their X-ray Protective Garments: Light Weight, Comfortable Feel & Excellent X-ray Protection. So, we created ComfortLite™. Simply stated, ComfortLite™ will be the most comfortable, lightest weight, full protection apron you have ever worn.

When we say full protection, we mean it! If the label says it’s 0.5mm lead equivalence, that’s exactly what it is. Unlike some of our competitors there’s no “Hocus Pocus Testing” or claims of protection that’s not there. Every ComfortLite™ is made to be the Lightest weight, most comfortable, full protection apron available anywhere today. Best put, AADCO is Radiation Protection by Radiologic Technologists who care about Radiation Protection of our colleagues.

ComfortLite™ Construction & Engineering

Made with "High Spec" X-Ban® X-ray Attenuating Materials.

X-Ban® is a 21st Century Attenuating Material, that has evolved over 3 decades of design, testing, experience and improvement. Evolving to a level of manufacturing excellence, that is maintained under unsurpassed quality control conditions and procedures.

During manufacturing X-Ban® materials are digitally scanned for consistent density and to eliminate any potential defects. After initial X-Ban® production, at our USA production facility in Vermont we perform a second test. Every roll of material is sampled and tested for quality and weight characteristics. A third test occurs immediately prior to apron production. Every yard of material is sight inspected before it is used to produce your X-ray Protective Garments. Finally, during Apron Production process 5 separate Quality Inspections of your Aprons are performed...

AADCO's ComfortLite™ Aprons are made with the latest improved version of X-Ban® "High-Spec" SuperLite™ Material. We inspect and select the most desirable premium X-Ban® material for its perfect features. Selecting the lightest weight material from each manufacturing run that’s produced. We call it, "High-Spec" X-Ban®. In addition to this, a combination of other engineering techniques are used to make ComfortLite™ Aprons lighter and more comfortable. We use lighter weight, highly pliable garment shell materials. We apply advanced engineering techniques to the patterns of each apron, changing the pattern design of each apron to achieve maximum efficiency by minimizing unnecessary weight to achieve the highest X-ray Protection to Weight Ratio in the industry. "High-Spec" X-Ban® is simply the highest state of the art in x-ray protection and one that continues to evolve to maintain maximum Radiation Safety efficacy in conformance with ALARA. All said and done, X-Ban® is unsurpassed in the X-ray Protection Qualities, and "High-Spec" X-Ban® is simply the best of the best.
ComfortLite™ Support Buckle™ Apron

Our Support Buckle™ Apron’s special design places support where you need it, directly at your lower back area. This back-support effectively transfers most of the apron's weight to your hips, providing a comfortable and effective back support apron that greatly reduces fatigue.

ComfortLite™ Waist Adjustable Apron

The body hugging design of our Waist Adjustable apron transfers most weight from shoulders to hips, increasing comfort and decreasing the fatigue normally associated with long procedures. Velcro closures provide easy off and on convenience. Elastic back sections provide added support. Breast or hip pocket provides added convenience.

ComfortLite™ Premium X-ray Protective Aprons

NEW

ComfortLite™ Super Comfortable, Super Lightweight, Full X-ray Protection: the lightest weight, full protection apron available today.

ComfortLite™ Support Buckle™ Apron

Our Support Buckle™ Apron’s special design places support where you need it, directly at your lower back area. This back-support effectively transfers most of the apron's weight to your hips, providing a comfortable and effective back support apron that greatly reduces fatigue.
ComfortLite™ Premium X-ray Protective Aprons

NEW

ComfortLite™ O.R. Quick-Drop™

X-ray Aprons

Remove your apron without breaking the sterile field. After the X-ray portion of the procedure is finished, removing your apron reduces fatigue. With assistance, the Velcro® tabs are easily reached from the rear of the gown. Once released, the apron slides down from under the gown. Super Lightweight Model Includes Lumbar Support Belt.

ComfortLite™ O.R. Quick-Drop 950™ Aprons

This innovative design, based on the Waist Adjustable apron, has special closures that have been added to allow the user the convenience of removing the apron from under a sterile gown. This allows the apron to be removed after the fluoroscopy portion of the procedure is finished, without removing the sterile gown or breaking the sterile field. Early removal reduces user fatigue.

This wraparound coat apron is specially designed with overlapping front panels that, when combined, provide full protection. We’ve also added features that make this popular model the most comfortable of its type to wear. Our wraparound’s 6 inch stretch waistbelt with lumbar support redirects weight from shoulder to hips, reducing upper back stress and the fatigue associated with long procedures. Our Velcro type side seams separate when sitting or bending. This apron combines light weight, flexible comfort and lumbar support with maximum protection.

## ComfortLite™ Vest & Kilt

Our Vest and Kilt incorporates improved weight distribution and wrap-around protection in a protective garment that’s very comfortable to wear. Most of the apron’s weight is removed from the shoulders and transferred to the hips, eliminating unwanted weight stress from the upper back muscles and spinal column, thus increasing comfort during long procedures. Vests include shoulder pads. Male vests include breast pocket. Female Vest and Kilt include pockets.

ComfortLite™ Premium X-ray Protective Aprons

NEW ComfortLite™
Super Comfortable, Super Lightweight, Full X-ray Protection: the lightest weight, full protection apron available today.

The ComfortLite™ ErgoFit® Vest & Kilt
Our ErgoFit® design apron is the solution to back fatigue. At 15 to 20% less weight than a conventional vest/kilt, the ErgoFit® eliminates back stress and user fatigue more effectively. The ErgoFit® reduces weight by eliminating the overlapping front closures of a conventional vest/skirt. Combined with AADCO’s exclusive ErgoFit® Back Support System, it transfers nearly 100% of the apron’s weight to your hips eliminates most shoulder weight and repetitive stress on sensitive contact points of the body. ErgoFit® Aprons reduce body fatigue and repetitive stress without internal stay supports and at an economical price.

## Use of Color Chart

When ordering an apron using this color chart, append the color letter to the end of any catalog number of the desired apron size and style. The “color letter” for each color is directly next to the color name in parenthesis. Example: Navy (N) If you wish to order an LP-203 but would like it in navy, you must order a LP-203N. If ordering a Custom Color Apron Please call 1-800-225-9014 if you have questions.

ComfortLite™ Apron 1 Year "No Inspection Required" Warranty

Many Lead Apron manufactures require that you inspect, i.e., fluoroscope your new apron within 7 to 14 days of shipping, making you accept responsibility for any defects that may appear later. That's a no-warranty clause. (read their fine print)

At AADCO, we don't do that... We have a rigorous inspection process that begins in the earliest stages of manufacturing and guarantees a quality product. No inspection by our customers is required to validate our warranty.

AADCO Medical, Inc., warrants the X-ray protective wear manufactured under its label to be free of defects in material and workmanship for two years. Repair or replacement will be done at the sole discretion of AADCO Medical, Inc., upon a no-charge basis and subject only to your return shipping the product to AADCO at your cost. This warranty assumes normal wear and tear and does not cover any product which has been abused or misused. This warranty represents the only warranty provided by AADCO Medical, Inc., for its X-ray protective wear. AADCO Medical, Inc., assumes no liability other than that expressly set forth in the foregoing warranty. No other warranty, whether express or implied, is provided. In no case shall the liability of AADCO Medical, Inc., exceed the purchase or replacement price of the product.

Extend Your Apron Warranty to a Lifetime Warranty For a nominal Charge

AADCO's Extended Lifetime Warranty

AADCO Medical, Inc extends the warranty of its X-ray protective aprons to be free of defects in material and workmanship for the life of the garment. Repair or replacement will be done at the sole discretion of AADCO Medical, Inc., upon a no-charge basis and subject only to shipping charges. This warranty assumes normal wear and tear, and does not cover any product which has been abused or misused. This warranty represents the only warranty extension provided by AADCO Medical, Inc., for its X-ray protective wear. AADCO Medical, Inc., assumes no liability other than that expressly set forth in the foregoing warranty. No other warranty, whether express or implied, is provided. In no case shall the liability of AADCO Medical, Inc., exceed the purchase or replacement price of the product.

It's a Warranty That Nobody Else Will Give You.

Front Protection Aprons $25/ea.
Wraparound Aprons $50/ea.
Includes Vest & Kilt Sets

Nationwide Sales, Installation & Service 1-800-225-9014  www.aadcomed.com
The first and only X-ray Protective Aprons ever to eliminate 100% of weight and contact at the shoulder areas, are our special Patented ErgoLite® Zero Fatigue Aprons. By using a reinforced but flexible internal framework, AADCO Medical has designed aprons that can entirely eliminate the Repetitive Stress and Fatigue Problems of the upper back and extremities associated with the shoulder contact and weight of conventional X-ray aprons.

Here’s How it Works:
We use two specially designed lightweight thermoplastic supports. Beginning at the waist of the garment, these supports are built into the garment’s lining. The supports extend from the waist, up and over the shoulders, and down the back of the garment, ending at the waist. Combined with the use of our adjustable height back support belt, these supports pick up the weight of the garment along their entire length, particularly at the shoulders. This eliminates not only shoulder weight from the apron, but also all contact at the shoulder.

How it Helps:
This design was specifically developed to help relieve the repetitive stress at the shoulders caused by prolonged lead apron shoulder contact. Repetitive Stress has been identified as a cause of chronic fatigue and pain in medical professionals who wear X-ray protective aprons for long periods of time on a regular basis.

ErgoLite® is an Advanced design—simple but effective. It helps eliminate repetitive stress and fatigue problems, while allowing the protective garment to remain both flexible and comfortable. The ErgoLite® Zero Fatigue is available in three of our popular X-ray protective apron styles: our 600 series Vest & Kilt, our 700 series Wraparound Aprons, and our 200 series Designer Buckle Front Protection Aprons. ErgoLite® Zero Fatigue aprons are the only products of their type. All of our ErgoLite® Aprons are made with our premium super-lightweight & LeadFree X-Ban® protective material. Available exclusively from AADCO Medical.

Fully Supported ErgoLite® Aprons have space under the shoulders. Virtually no contact is made between the shoulder and the apron. No other X-ray Apron can do this.

There’s Nothing Else Like It!

The Patented ErgoLite® Apron’s internal support system keeps the weight and danger of repetitive stress off your shoulders and back.

Call 1-800-225-9014

Ask About Our 60 Day Trial!
You can arrange for a sixty day trial when you order your an ErgoLite® Apron. If you don’t agree that its Advanced design and support are for you, call us within 60 days and return the apron in saleable condition for full credit.

U.S. Patent Nos. 5,834,789 & 5,844,246 & 8,710,477
"The ErgoLite® Apron Will Save Your Back"

Douglas Coldwell, M.D. PhD,
Interventional Radiologist, and Professor of
Radiology & Radiation Oncology, tells us why:

Dr. Coldwell feels so strongly about the benefits of the Patented ErgoLite® Aprons he’s worn for 10 years, that he volunteered to help us spread the word to his colleagues.

Dr. Coldwell shares his thoughts with us in an unscripted video. The statements below are his.

"ErgoLite® gives me good radiation protection. It helps my back and shoulders by redistributing the weight onto my hips. It's a great piece of equipment and I swear by it.

What you need to be doing is you have to concentrate on the patient and not on your back or anything else. That has to go into the background, because if it comes to the foreground while you’re doing a case, it means you’re distracted. And doing this stuff, you can’t be distracted.

It gives me safety 360 degrees. It’s comfortable, and I don’t have to be concerned about my back during long cases. It's a winner on 3 counts."

Dr. Coldwell’s video is available via email!

What People are Saying about ErgoLite®

I’m writing to let you know how pleased I am with the ErgoLite® vest & kilt system that I purchased last month. The shoulder support feature has effectively removed all weight from my shoulders and makes doing procedures much more comfortable. I am impressed by how much better this lead is than all other products I have used during the last 11 years in catheterization laboratories. My compliments to the engineers who designed this product.

Charles Landau, M.D. Cardiologist
St. Vincent's Hospital

My ErgoLite® apron has gotten a lot of use. It has been beneficial to me because of a cervical radiculopathy that I have. I am certainly glad that this vest was developed... Tanya Davis-Spaulding, MD
Alexandria, VA

...The (ErgoLite®) vest and kilt are very comfortable to wear for extended periods of time. It does appear that the insertion of the acrylic pieces lighten the load on the shoulders and back....

Glen A. Henry, MD
New Haven, CT

This (ErgoLite®) is the most comfortable one that I have used. Because of the stays in the shoulder, the weight of the lead is primarily on the hips. I have had no back problems since using the ErgoLite®. I perform over 600 cases a year, so the comfort of the lead is extremely important to me. Thank you for this fine product.

Jeffrey N. Berman, MD . Director, Cardiac Cath Lab
St. Vincent's Hospital...

I had sustained a cervical neck injury and was unable to wear the regular heavy lead aprons I had been using..... I am confident that the ErgoLite® apron fitted to me would be beneficial to other professionals who are required to wear lead. This product clearly reduces repetitive stress to the neck and shoulder area caused by wearing heavy lead aprons, I certainly would recommend the ErgoLite® to other professionals. Thank you!

Lawrence M. Epstein, MD, Director, Electrophysiology Lab
Beth Israel Deaconess Med. Ctr.

This (ErgoLite®) apron has a special design which includes heavy duty plastic stays over both shoulders thus re-distributing the weight of the apron in a somewhat more diffuse manner. In conjunction with the belt, it feels almost non-existent and it is not unusual to forget that I am wearing it. Its comfort is extremely high with loss of the usual sense of heavy weight which is more commonly noted with a standard lead apron.

I have been very pleased with the performance, comfort and appearance of this particular style apron. I happily recommend it to anyone who performs procedures requiring a lead apron for protection.

Mark F. Yost, MD, Director of Interventional Radiology, Hamot Medical Center

I had the pleasure of using the ErgoLite® apron provided to me from your company for the last several months. I have found the decision features are very effective in relieving weight off my shoulders and neck. The lower apron itself is very light weight. In summary, I have found this to be a very effective apron for relief of neck and shoulder pressure and would highly recommend it to others.

Ronald H. Fields, M.D.F.A.C.C. Medical Director, Cardiac Catheterization Lab, St. Marys Medical Center

I have been very pleased with my (ErgoLite®) apron. Many of my colleagues have moved to skirt and jacket type aprons. However, I have much enjoyed my single piece apron. It is extraordinarily comfortable and unfortunately turns out to be a frequently borrowed apron when visitors come to the interventional radiology suite. I acquired a waist band with the apron, which helps to make it even more comfortable and less stressful on my back after a long day in the interventional radiology suite. I would highly recommend this model to any radiologists for occasional use during the day or extended use during long interventional radiology procedures.

Joseph R. Stock, M.D. Chairman, Department of Radiology, Crozer-Chester Medical Center

Note: Original letters on file and copies are available upon request.
RayShield® Vest & Kilt

RayShield® Vest and Kilt incorporates improved weight distribution and wrap-around protection in a protective garment that's very comfortable to wear. Most of the apron's weight is removed from the shoulders and transferred to the hips, eliminating unwanted weight stress from the upper back muscles and spinal column, thus increasing comfort during long procedures. Vests include shoulder pads. Male vests include breast pocket. Female Vest and Kilt include hip pockets.

ErgoLite® Wraparound Apron

ErgoLite® Wraparound Aprons are a unique patented product that, combined with AADCO's exclusive ErgoLite® Internal Support Frame, transfers 100% of the apron's weight to your hips, eliminating all shoulder contact and repetitive stress on sensitive contact points of the shoulder, clavicle, cervical/thoracic spine, and upper back muscles. Adjusted properly, the apron doesn't even touch your shoulders.

RayShield® Wraparound Apron

Advanced RayShield® Wraparound Apron is specially designed with overlapping front panels that when combined provide full protection. We've also added features that make this popular model the most comfortable of its type to wear. Our Wraparound's 6 inch stretch waistbelt with lumbar support redirects weight from shoulder to hips, reducing upper back stress and the fatigue associated with long procedures. Our Velcro® type side seams separate when sitting or bending. This apron combines light weight, flexible comfort and lumbar support with maximum protection.

RayShield® Support Buckle Apron™
Our Support Buckle™ Apron’s special design places support where you need it, directly at your lower back area. This back support effectively transfers most of the apron’s weight to your hips, providing a comfortable and effective back support apron that greatly reduces fatigue.

The ErgoLite® MagnaBack Vest & Kilt
• Exclusive Magnetic Back Closure
• Easy On & Easy Off, No Need for Help
• Exclusive Ultra-Light Design
• You’ve Never Worn a More Comfortable Vest

Our ErgoLite® MagnaBack Vest and Kilt is a specially designed lighter-weight garment that is easy-on and off. You don’t need help to put this ultra-lightweight garment on because the exclusive magnetic clasp at the back of the garment does the work for you.
The MagnaBack is lighter weight because it is not designed with unnecessary overlap panels, and provides full radiation protection coverage at the listed lead equivalence. Like all of our patented ErgoLites®, the MagnaBack creates support directly at your lower back area. With AADCO’s exclusive ErgoLite® Internal Support Frame, it transfers 100% of the apron’s weight to your hips, eliminating all shoulder contact and repetitive stress on sensitive contact points of the shoulder, clavicle, cervical/thoracic spine, and upper back muscles. Adjusted properly, the apron doesn’t even touch your shoulders. Exclusively from AADCO Medical.

For X-Ban® LeadFree substitute an “L” for the “X” in the Catalog Number
For X-Ban® 0.35mm Substitute an “A” for the “X”
*Standard Color is Blue. Colors, Patterns, Sizing, Apron Construction and Warranty on page 70 & 71.

Try It, FREE for 60 days.

Just slide it onto your arms like this, shrug your shoulders up and fasten the back support belt tightly above your hips.
**ErgoLite® “V” Power Ventilated X-ray Vest Will Save Your Back.**

Air Cooled Comfort in an Ergonomic Design  
U.S. Patent Nos. 5,834,789, 5,844,246 & 8,710,477

---

**ErgoLite® "V" Vest & Kilt**

Not only does this x-ray protective vest eliminate 100% of the weight and contact at the shoulder areas, the patented ErgoLite® "V" now combines its exclusive ergonomic design with a Ventilation/Cooling System that helps keep you cool, making it even more of a Zero Fatigue Apron.

Of course all of our ErgoLite® Aprons include a reinforced, flexible internal framework that can entirely eliminate the repetitive stress and fatigue problems of the upper back and extremities associated with the shoulder contact and weight of conventional x-ray aprons, now combined with an internal cooling system.

This is possible because of ErgoLite's® unique design that keeps the garment separated from your upper body. This separation area allows for natural ventilation, enhanced with continuous, and ultimately cooled air movement.

**TRY IT, FREE for 60 days.**

The ErgoLite® "V"
Mechanisms are rear mounted on the Back Support Belt, weighing less than a pound. The control knob can be reached from the front, but is biased toward the rear so that it can be reached from the back slit of a sterile gown.

The cooling system has a circulator output of up to 34 CFM. Battery time to discharge at full power is approximately 2 hours, with recharge for the second battery being the same 2 hours. Overall Battery Life is 1,000 hours.

**Soft- &-Clean™ Disposable Thyroid Liners**

Your Thyroid Shield is the most difficult item to keep dry and clean. Because it comes in direct contact with your skin, perspiration can cause chaffing, rashes, and unsanitary conditions, especially if you share your shield with others.

Our Soft- &-Clean™ Disposable Thyroid Shield Liners are made of a super-soft fiber material. This inexpensive "soft feel" liner adheres easily to your existing thyroid shield with two self stick tabs and because it is value priced, a new cover can be used after each procedure. Easy to put on: simply lay the inside of your thyroid shield on top of the liner, so that the end of the slit between the 2 tabs is at the center of the neck edge of the shield, as shown. Then strip the backing off the self stick tape on each tab, fold over, stick down and put your thyroid shield on.

**RayShield® Maternity Shield**

Designed to add an additional 0.5 MM lead equivalent frontal protection of the utero-fallopian area when used in conjunction with a 600 Series Vest and Kilt. Provides excellent added protection for those who may become pregnant and during the first trimester of pregnancy. Shown being used with LP-X600 kilt, not included.

**RayShield® Apron Sleeves**

When procedures result in increased scatter radiation exposure to the arm, apron sleeves can provide the necessary protection. ErgoLite® Apron Sleeves are specially designed for ErgoLite® Vests & Wraparound Aprons. This sleeve’s special design allows it to be worn without placing weight on the shoulder attachment. This is critical to retain the proper weight balance and effectiveness of any ErgoLite® Apron. The sleeve attaches by the use of an elastic strap just above the elbow. It comfortably secures the sleeve to the arm, while a Velcro® type attachment at the shoulder only keeps the sleeve in a suitable protective position. Color Black.

- LP-EX800 Reg. Size | $125
- LP-EX801 Large Size | $125
- LP-EX803C Reg. Size, Custom Color | $201

**ErgoLite® & RayShield® Protective Accessories**

**RayShield® Apron Sleeve**

When procedures necessitate increased scatter radiation exposure to the arm, apron sleeves can provide necessary protection. Apron sleeves can be permanently attached to any apron, but come standard with a universal attachment strap that loops over the apron shoulder, allowing user attachment or removal as desired. 0.5MM lead equivalent. Color Black.

- LP-C300 Reg. Size | $165
- LP-C301 Large Size | $165
- LP-C303C Reg. Size, Custom Color | $155
- LP-C304C Lg. Size, Custom Color | $185

**ErgoLite® Thyroid Shield**

Specially designed to perform comfortably with your ErgoLite® Vest or Wraparound Apron. The shield is secured, not by wrapping around the neck like conventional thyroid shields, but by attachment to Velcro tabs on the front of any ErgoLite® vest or wraparound apron. This provides for better air flow around the shield, elimination of any possible chaffing and improved user comfort. The protective material is X-Ban® 0.5MM lead equiv. Color Black.

- LP-EX800( ) Custom Color | $118
  See page 71 for additional colors

**RayShield® Maternity Shield**

Designed to add an additional 0.5 MM lead equivalent frontal protection of the utero-fallopian area when used in conjunction with a 600 Series Vest and Kilt. Provides excellent added protection for those who may become pregnant and during the first trimester of pregnancy. Shown being used with LP-X600 kilt, not included.

- LP-840 Color Blue | $165
ErgoLite® & RayShield® Premium X-ray Protective Aprons

Quality Begins with Our ISO 13485 & ISO 9000 Quality Systems

With an available Extended Lifetime Warranty* No One Else Will Provide

X-Ban® is a multi-attenuator composite radiation protection material. This specialized composite material is simply the highest state of the art in x-ray protection and one that continues to evolve to maintain maximum effectiveness. Advanced X-Ban® is unsurpassed. When used in 0.5mm lead equivalence, its effective radiation attenuation provides 98% attenuation of scattered radiation at 80 KVP, and 94.1% attenuation at 100 KVP. These are independent test results, certified by the National Physics Laboratory to the BS EN 6133-1:2002 International Standard.

X-Ban® Quality
The formulation of its attenuating materials have evolved to this level, manufactured under unsurpassed quality control conditions. During manufacturing Advanced X-Ban® material is digitally scanned for consistent density. To provide a second test after production each roll of material is sampled and retested. Prior to apron production every yard of this material is sight inspected before it is used to produce your garments.

X-Ban® 0.35mm & 0.5mm Super-Lightweight
Advanced X-Ban® is offered in four standard protective garment constructions: 0.35mm and 0.5mm Super-Lightweight, and 0.35mm and 0.5mm Super-Lightweight LeadFREE. Lead Equivalent Protective Aprons are manufactured using Advanced X-Ban®, a special, synthetic composite protective material that offers improved dimensional strength and durability of an advanced polymer material. An advanced metallic deposition technique places lead and multiple attenuating materials in suspension in one homogeneous layer of distinct attenuating materials, creating a super light weight optimized protective apron material while averaging a weight improvement that is 30% lighter than conventional lead vinyl aprons. To our knowledge, no apron in the industry is lighter in weight while providing the same radiation protection.

* Front Protection Value. In wraparound protective garments, back protection equals one half of this amount.
Note: 0.5mm Lead Equivalent material provides approximately 98% x-ray absorption (attenuation) at 80 KVP and 94.1% x-ray absorption (attenuation) at 100 KVP, of scattered radiation. Independently Tested & Certified by the National Physics Laboratory to the BS EN 6133-1:2002 International standard.

X-Ban® Durability
Manufactured under unsurpassed quality control conditions with over 30 years of experience in radiation protection manufacturing, we take tremendous pride in making the best x-ray protective garments in the industry. Our Vermont production team treats every garment they make, “like it was being hand delivered to a neighbor.” That’s old fashioned quality in an innovative 21st century product. The result is simply the best product available, backed by our Lifetime Warranty.

ErgoLite® Lifetime Warranty
AADCO Medical, Inc warrants its ErgoLite® X-ray protective wear to be free of defects in material and workmanship for the life of the garment. Repair or replacement will be done at the sole discretion of AADCO Medical, Inc, upon a no-charge basis and subject only to your return shipping the product to AADCO, at your cost. This warranty assumes normal wear and tear, and does not cover any product which has been abused or misused. This warranty represents the only warranty provided by AADCO Medical, Inc., for its it's ErgoLite® X-ray protective wear. AADCO Medical, Inc., assumes no liability other than that expressly set forth in the foregoing warranty. No other warranty, whether express or implied, is provided. In no case shall the liability of AADCO Medical, Inc., exceed the purchase or replacement price of the product.
It’s a Warranty That Nobody Else Will Give You

RayShield® Warranty
AADCO Medical, Inc warrants its RayShield® X-ray protective wear manufactured under its label to be free of defects in material and workmanship for one year, on the same terms and conditions as the Warranty above.

AADCO "No Inspection Required" Warranty Policy
Many X-ray Protective Apron manufacturers require that you inspect ie; fluoroscope your new apron within 7 to 14 days of shipping, making you accept responsibility for any defects that may appear later. That’s a no-warranty clause. (read their fine print)
At AADCO we have a rigorous inspection process that begins in the earliest stages of manufacturing and guarantees a quality product. No Inspection by you is required...
Manufacturing Inspections are our responsibility, as they should be.

X-ray Protective Accessories

ComfortLite™ Maternity Apron

Features:
■ 100% nylon covering.
■ Tailored to female proportions.
■ 0.5mm lead equivalent front protection in critical areas from the xyphoid process to approximately 10cm below the Symphysis Pubis.
■ 0.25mm lead equivalent back protection.

Of course, the best protection from ionizing radiation during pregnancy is not to be exposed. However, if you must be present, a maternity apron provides an added safety level to help minimize the risk of fetal exposure.

LP-C752 Color Blue $657

RayShield® Scoliosis Shield

■ Designed to protect breast tissues during Scoliosis spine examinations.
■ 0.5mm lead equivalent.

RayShield® X-ray Protective Gloves

RayShield® Radiation Resistant Sterile Procedure Gloves

Quality Rayshield® X-ray attenuating sterile procedure gloves provide increased protection from direct X-ray beam and scattered radiation exposure during any procedure requiring the use of X-ray fluoroscopy. Recent studies have shown that hand exposure during a fluoroscopic procedure can be as much as four times greater than eye or body exposure.

Rayshield® attenuating gloves provide superior performance over thicker, conventional lead-loaded latex surgical gloves, with excellent flexibility, dexterity and touch sensitivity. Their anatomically correct curved finger design and thinness helps to reduce finger fatigue. For their thickness they offer better X-ray absorption than any comparable glove. They are powder free and made from natural dry rubber to minimize irritant exposure. Gloves are provided sterilized by ETO gas. Gloves may also be autoclaved at 121 degrees centigrade.

Rayshield® Attenuating Gloves are shipped in sterile, ready-to-use single pair packages.

5 pairs per box. All Sizes $350 per box.

RayShield® CT Rationale
Effectively Reduces CT Radiation Exposure up to 60%
Provides Critical Radiation Dose Mitigation for CT Patients Eyes, Breasts & Thyroid
Reduces Dose Without Compromising Imaging

Dose Reduction
Breast Shields, Up to 58%
Eye Shields, Up to 50%
Thyroid Shields, Up to 60%

RayShield® CT
Offers greatly enhanced radiation dose reduction in critical areas of the eyes, breasts & thyroid. At .07mm lead equivalence it improves dose reductions well beyond conventional CT methods, and can provide greater dose reduction than competitive products. In so doing, it meets ALARA (as low as reasonably achievable) guidelines. It does so at the lowest competitive price and the lowest cost per procedure.

RayShield® CT Breast Shield
Offers up to 58% breast dose reduction. Ships with attached 1/4” foam offset pad.

CT-120 Adult Medium
CT-130 Adult Large

RayShield® CT Pediatric Breast Shield
Offers up to 58% breast dose reduction.

CT-140 Neonatal 10 pack
CT-141 1 year old 8 pack
CT-142 5 year old 6 pack
CT-143 10 year old 4 pack

RayShield® CT Eye Shield
Offers up to 50% lens eye dose reduction.

CT-100 20 pack

RayShield® CT Thyroid Shield
Offers up to 60% thyroid dose reduction.

CT-110 10 pack

Universal Radial Entry Armboard

The Universal Radial Entry Arm Board is Radiolucent/Carbon Fiber and designed for all purpose use, including procedures in which an image intensifier is used. Other than the pivot joint, the armboard is constructed of all radiolucent materials so that no metal parts should interfere with X-rays. The armboard is very lightweight and easy to handle. It is designed to be placed comfortably under the patient's body/table pad for support, pivots easily with one hand operation, and holds its position. It utilizes a simple, adjustable resistance pivot mechanism with no fragile parts to break down. A one-inch thick conductive upholstered pad is also available as an option.

Easy-Pivot™ Radiolucent Armboard
The Easy-Pivot™ Arm Board is designed for all-purpose use, including procedures in which an image intensifier is used. Other than the pivoting mechanism (the 5 inches most proximal to the table) the armboard is constructed of all radiolucent materials so that no metal parts should interfere with X-rays. The armboard is very lightweight and easy to handle. The Easy-Pivot™ is designed to pivot easily with one hand operation and hold its position. There are no gears or teeth to break. The Easy-Pivot utilizes a simple, adjustable resistance pivot mechanism with no fragile parts to break down. A two-inch thick conductive upholstered pad comes standard with the armboard.

Cat # SU-2000 Easy-Pivot w 2" Pad $471
Cat # SU-2003 Easy-Pivot w 3" Pad $501

Easy-Pivot™ Wide Armboard
The same quality features of our Easy-Pivot™ armboard with an 11"x 24" wide armboard surface.

SU-2000W $526

Armboard Pads
Replacement Arm Board Pads have waterproof seams and are covered with conductive vinyl. They include Velcro® to secure pads to armboard.

Available in 2" & 3" thickness

Custom Table and Armboard Pads, Armboards
& Table accessories are available!
Armboards, Table Pads & Procedure Accessories

AADCO Table and Armboard Pads are the finest product of their type available in the industry today: offered in a variety of pad filler materials and upholstery/covering materials, which are explained and compared for your convenience below. All Advanced Table Pads help reduce patient discomfort and ischemia, and have a limited warranty against defects in material and workmanship for a period of two years from the date of purchase.

Five Types of Advanced Table Pad Materials

**Lo-Sorb™: Low X-ray Absorption Table Pads**
When your application is imaging of vessels and soft tissue using contrast media designed for low to mid-diagnostic energy ranges, table pads can make a big difference in image quality. Lo-Sorb™ Table Pads provide the highly desirable low attenuation properties that maximize imaging results. Lo-Sorb™ Table Pads provide attenuation .065 mm Al. equivalent per inch* of pad thickness. Lo-Sorb™ Table Pads come with a standard black urethane coated nylon upholstery. Lo-Sorb™ Low X-ray Absorption Table Pads are standard on some of America’s top original equipment manufacturer’s angiographic and X-ray tables.

**Pressure Displacing Foam™**
Our standard material of high quality, 2lb. density foam exceeds other original manufacturers pad quality, with characteristics suitable for good pressure displacement and long procedures. The 2 inches of Pressure Displacing Foam™ have X-ray attenuation properties equivalent to 0.2mm of aluminum, and are X-ray radiolucent for artifact free results.

**Contour Foam™**
A premium material offering excellent body support and comfort. The technology for this type of foam was originally developed for NASA, and used as seating material to relieve discomfort experienced by astronauts during extended flight space missions. The 2 inches of Contour Foam have X-ray attenuation properties equivalent to 2.66mm of aluminum, and are X-ray radiolucent for artifact free results.

**Lami-Foam™**
When long procedures cause bottoming out, which occurs when pressure points on the patients body begin to feel the table top, Lami-Foam is the answer. Made from a laminated combination of Contour Foam and Super-Support foam, Lami-Foam provides a superior combination of support and comfort. The 2 inches of Lami-Foam have X-ray attenuation properties equivalent to 2.mm of aluminum, and are X-ray radiolucent for artifact free results.

**Super-Support Foam™**
Offering extra firm support for all procedures and conditions in which firm patient support is advantageous. This is the only material available with our waterproof Polyguard™ coating. The 2 inches of Super-Support Foam™ has X-ray attenuation properties equivalent to .86 mm of aluminum, and are Radiolucent artifact free results. Only available as a Custom Order.

Four Types of Advanced Table Pad Upholstery

**Black Nylon** Lightweight and radiolucent, this tough durable material stands years of hard use and exceeds the durability and strength of our best vinyl upholstery. Its special heavy duty coating is waterproof and resists staining. Seams are sewn and water resistant. Available with all foam filler materials.

**Blue Vinyl** Our vinyl fabric is both durable and waterproof. Seams are heat sealed and virtually waterproof. Available only with Pressure Displacement Foam™ filler material.

**Black Conductive** This vinyl coated nylon reinforced material is specially manufactured to be electro-conductive. Seams are sewn and water resistant. Available in all foam filler materials.

**PolyGuard™ Coating** This coating technique renders a table pad impervious to all fluids including betadine. It is only available on our Super-Support Foam™ filler.

Ordering Table & Armboard Pads

AADCO Medical offers a wide variety of standard size table pads. We also offer custom designed table pads and table pad systems.

Many options are available for seam types, filler material, covering material, safety straps and Velcro® type fasteners. To the right is a list of information necessary when specifying a custom made pad.

Premium Clark Socket
SU-5396
Up to 18mm
Arterial Cannulization Support
A rigid yet comfortable support for Arterial Cannulization which provides comfortable immobilization of the wrist and improved cannula retention. This cannulization device is improved with self sealing Velcro® type straps that have better seal retention than those of comparable models. Anatomically shaped, this device provides needed support in an ultra-lightweight and comfortable positioner. Not sterile.

- 1" wide self sealing Velcro® type strap
  - Rigid but comfortable anatomical support
  - Reusable or disposable

Adult Size  P-407  $148  24 per case

Disposable Arterial Cannulization Support
This is the same basic support featured above without the straps and packaged in bulk (36 per box) for economy. With the aid of adhesive tape for restraint, this economy model provides the same comfortable support and rigidity that helps prevent arterial wave damping and facilitates cannula retention. Not sterile.

SU-002  $149 / Box of 36

Conductive Upholstered Pillows
High quality polyester fiber filled pillows with Black Conductive Cover

- LARGE - 20" x 26"
  - P-610  1-11  $43 / ea.
  - P-610CS  case of 12  $373 ($31.08 / ea.)
- SMALL - 12" x 16"
  - P-611  1-11  $34 / ea.
  - P-611CS  case of 12  $299 ($24.91 / ea.)

Advanced ArmShield
Shields arm safely by preventing it from falling off table side. Mounts by sliding under table pad. Allows staff to lean over area by shielding patients arm and IV's. Available with reusable pad.

SU-607  ArmShield  $99
SU-608  Reusable Pad  $92

Anti-Fatigue Floor Mats
Soft Cushioning, Anti-Slip, Anti Fatigue, Highly Durable

Stand longer with less muscle strain and fatigue. These anti-fatigue mats offer a combination of ultra-soft cushioning with diamond anti-slip treads. The Tough EVA Rubber diamond plate surface is bonded to dense foam base. The beveled edges help reduce tripping. The mat is 9/16" thick.

Provides Anti-Fatigue Comfort with Diamond Plate Traction.

- Material-Rubber, +EVA / EPDM Resin
- Antistatic Qualities: Top Surface Layer 7-9 SQ, Bottom layer 3-5 SQ
- Caution: Do not wear high heels on anti-fatigue mats

Available Sizes/Prices
- N-830  2 x 3'  $52
- N-831  3 x 4'  $113
- N-832  3 x 5'  $130

**Patient Safety Straps for Somatome & HiQ**

A five inch wide strap that may be wrapped around patient and table top to secure the patient's position. P-539 Teal Color Nylon $168

**Patient Safety Strap for Somatome Plus 4**

A fourteen inch wide sectional torso strap that is a direct replacement for the original manufacturer's safety strap. P-540 Teal Color $542

**Universal MRI/CT Patient Safety Straps**

A five inch wide strap that may be wrapped around patient and tabletop to secure the patient's position. P-136B Black Color $157

**Universal Wide MRI/CT Safety Strap**

A fourteen inch wide sectional torso strap that is a direct replacement for the original manufacturer's safety strap. P-138 $345

---

**Quik-Strap™**

Quik-Strap™ eliminates the need to use adhesive tapes to secure patients when positioning or restraining. This strong but comfortable strap is a versatile Velcro® type material, which may be cut to any length desired. The strap seals to itself with a Velcro® type closure, placing a soft pile material against the patient's skin. The result is a strap which can serve many purposes without the discomfort and risk of skin injury associated with adhesive tape.

C-Gel™ Pads and Positioners provide superior performance in reducing dermal pressure points and capillary compression during long procedures. Made with a dry elasto-polymer, C-Gel™ achieves near tissue equivalence with the necessary high viscosity to help provide the protection your patients need from PRESSURE SORES, at a cost you can afford.

Armboard Pads provide protection for the bony prominences of the immobilized extremity, as well as muscle tissue areas. Alternately, these pads can be rolled for other uses, such as padding areas that need special or extra support.

Small Armboard Pad 4"x15"x 1/4"
GL-2230 $40

Lg. Armboard Pad 4-1/2"x24"x 3/8"
GL-2240 $94

C-Gel™ CHEST ROLLS

Offered in a wide variety of sizes, Flat Bottomed Chest Rolls are used to protect the patients chest while in the prone position. They can be used for a variety of positioning needs including oblique or lateral stabilization.

Flat Bottom Chest Roll
12"x4" GL-2410 $105
16"x4" GL-2420 $146
20"x4" GL-2430 $184
16"x6" GL-2450 $340
20"x6" GL-2460 $428

C-Gel™ Heel & Foot Protectors

Heel protectors can be used with Lithotomy holder straps to protect foot & heel.

Foot & Heel Protector W/ Velcro®
GL-2290 $72

Foot, Heel & Sole Protector 4"x15"x 1/4"
GL-2280 $40

Over one million people are afflicted with pressure sores in U.S. hospitals every year. It is demonstrated that the cost (of treatment) is estimated conservatively at 55 billion dollars per year. Affordable C-Gel™ pads can help prevent pressure sores by reducing the pressure points that cause the capillary constriction responsible for pressure sores.

AADCO’s C-Gel™ pads and positioners are already in use in hospital operating rooms throughout the USA. C-Gel™ Pads are made from tissue equivalent dry elasto-polymer gel that won’t leak or flow. C-Gel™ Pads contain no latex or silicones. They are X-ray translucent (radiolucent at tissue equivalence) and artifact free. They are easy to clean with most standard disinfectants. They do not absorb body fluids or support bacterial growth and should remain odor free. C-Gel’s™ polymer is fire-retardant.

C-Gel™ Pads and Positioners are made to the highest standards and performance requirements of today’s demanding clinical environment.

C-Gel™ Exclusively by AADCO Medical, Inc.

C-Gel™ is the exclusive trademark of AADCO Medical, Inc.

C-Gel™ Dry Elasto-Polymer Pads & Positioners

Nationwide Sales, Installation & Service 1-800-225-9014 www.aadcomed.com
Positioners

C-Gel™ Arm Protectors
Designed to protect the Ulnar/Brachial Nerve area these arm protectors offer either complete area protection from above the elbow to wrist (#GL-2260) or greater access to lower extremity (#GL-2270). Both designs wrap arm and close with built-in Velcro® type closures.

Ulnar/Brachial Nerve Protector w/Velcro® 12"x18"x 1 4⁄4 " GL-2260 $81
Oval Ulnar/Brachial Nerve Protector w/Velcro® 13-1⁄2"x5"x 1⁄4 " GL-2270 $81

C-Gel™ Sand Bag Style Positioners
Sandbag style positioners can be used for a wide variety of positioning needs, from laminectomy supports to ankle supports for foot prep. They are useful in providing comfortable neck extension for a variety of neck surgeries, as well as ophthalmic procedures.

Small Oval (Sandbag) 4-1⁄2"x10"x2" GL-2360 $74
Large Oval (Sandbag) 4-1⁄2"x14"x2" GL-2370 $86

C-Gel™ Knee Crutch Pads
In addition to their use in a variety of stirrups, these pads can be used for pediatrics, neonatal, either flat or rolled as supplemental padding.

Small Knee Crutch Pad 9"x11"x 3⁄8 " GL-2300 $45
Medium Knee Crutch Pad 12"x18"x 1⁄4 " GL-2310 $58
Large Knee Crutch Pad 20"x 20"x 1⁄2 " GL-2320 $206

C-Gel™ Head Pads
These positioners serve to provide elevation and protect the head during long procedures. The Horseshoe donut allows positioning in the prone position while providing easy access for anesthesia. Very useful for Ophthalmic, ENT, head or neck surgery, etc.

Head Donut 8"OD x 3"ID x 1-3⁄4 "H GL-2150 $96
Horseshoe Donut 8"OD x 3"IDx 1-1⁄4 "H GL-2170 $96
Pediatric Head Donut 5-1⁄2"OD x 2-1⁄2"ID x1-1⁄4 "H GL-2160 $78
Anesthesia Prone Head Rest w/ tube channels GL-2220 $226

C-Gel™ Table Pads
Used for a variety of procedures that exceed one hour in duration, C-Gel™ Table Pads may be used for Supine, Prone, Oblique or Lateral body positioning. Used for Open Heart, Thoracic, Orthopedic, Abdominal, Gynecologic or Urologic procedures, etc., C-Gel™ Table Pads improve comfort and reduce the risk of tissue damage that may occur in some cases.

3-Piece Full Table Pad Set (above)
GL-2130 $613
Head Section 20"x 9"x 1⁄2 " GL-2130-1 $90
Middle w/GU Cutout 20"x39-1/2"x 1⁄2 " GL-2130-2 $383
Foot w/GU Cutout 20"x 20"x 1⁄2 " GL-2130-3 $181

3/4 Table Pad w/GU Cutout 20"x39-1/2"x 1 1⁄2 " GL-2120 $435
Foot w/GU Cutout 20"x 20"x 1⁄2 " GL-2110 $624

Nationwide Sales, Installation & Service 1-800-225-9014 www.aadcomed.com
Our Advanced Polyfoam Positioners are in stock items, available in 4 standard types. All positioners are made from the highest quality Polyfoam F/R™ & Durafoam™ materials.

**Standard PolyFoam F/R™**
Our regular Polyfoam F/R™ positioners are supportive yet comfortable. They are manufactured from special high density resilient 2 lb. estar foam which is functionally radiolucent and artifact free. They are plain foam, Not Upholstered or Coated. The high-friction surface eliminates slippage. These positioners are preferred for radiographic, fluoroscopic and other imaging uses.

**Armor-Guard™ Coated**
Armor-Guard™ Coated Positioners are made from specially coated high density Dura-foam™. Their Armor-guard™ coated surface can be easily wiped clean. These positioners are functionally radiolucent making them an excellent choice for radiographic use. In some instances, their vertical edges, when X-rayed at 90 degrees making the edge parallel to the primary beam, can create a slight image shadow. Users should place 90 degree edges outside the area of interest. These positioners are preferred for radiographic, fluoroscopic and other imaging uses.

**Nylon Covered**
Positioners are covered with quality lightweight waterproof blue nylon. Sewn seams are water resistant and functionally radiolucent. Positioner surfaces can be easily wiped clean. These positioners are functionally radiolucent making them an excellent choice for radiographic use, and recommended for radiographic use.

**Vinyl Upholstered**
Positioners are upholstered with quality waterproof vinyl. Sewn seams are not artifact free. This positioner is recommended for nuclear medicine, ultrasound, O.R. and other non-radiographic use.

---

### Regular and Large Rectangles
Our high density foam rectangles provide excellent vertical support and comfort.

  - $69

**Erect Positioner**
Provides better positioning for AP chest X-rays taken with a portable unit at bedside, on litter or gurney.

- Keeps body erect for AP and Lateral Projections
- Reduces the risk of lordotic films
- Allows lateral projections on the most difficult patients

PB-302
PB-181 Upholstered in Waterproof Nylon $88

**Cardiac Wedge**
Ideal for cardiology. The Cardiac Wedge provides improved AP projection positioning.

PB-301 Cardiac wedge uncovered $87
PB-186 Upholstered in waterproof nylon $185
PB-187 Conductive covering $189

**Positioning Sets**
Several combinations of Standard Positioners are listed below as Standard Positioning sets. Please reference the illustrated diagrams on pages 87-88 to identify individual positioners. Unless specifically indicated, individual positioners in sets are not upholstered or coated.

**Deluxe Positioning Set**
Consists of nine pieces that assist in a wide range of positioning requirements.

**Set #19**
Includes:
- Regular Rectangle 2" x 7" x 9 1/2"
- (2) 16° Triangles 2 1/2" x 7" x 10"
- Oblique Finger Block
- (2) 34° Triangles 3" x 4" x 7"
- 45° Triangles 7" x 7" x 7"
- Circular Disc

PBS-019 8 pieces $183

The Decubi-System™

The Decubi-System™ is one positioner for all types of decubitus films. Whether you need to do decubitis chest or abdomens, or even cross-table laterals, the Decubi-System™ positioner provides a fast, easy and efficient way to produce high quality radiographs. The Decubi-System™ accommodates all kinds of cassettes and is specifically designed to work with grid-protector/cassette holders. The basic platform positioner comes with its own Dura-Foam™ Positioning Block (22"x13"x1½" water-proof nylon covered), attached to the platform with Velcro® type hook & loop fasteners. To hold cassettes and grids in a vertical position, one uses the channel created between platform and pad. The width of the channel can be adjusted to accommodate any thickness of cassette, with or without grid, simply by moving the position of the pad on its Velcro® type fasteners.

N-630 $597

The One Step Positioner

The One Step is the ultimate table top lateral positioner allowing perfect lateral extremity positioning every time even with difficult or trauma patients. The One Step offers one standard and two optional positioners which fasten on the standard base platform.

N-529 $339

Chest Decubitus Positioner

Super-support foam allows minimal sponge compression. Body is raised 2" off table top to provide positioning that facilitates visualization of the chest wall adjacent to the pad. This durable pad is covered in water-proof blue nylon. Size 13"x22.5"x2"

PB-001 $142

Decubitus Pad (Fluoroscopic)

Ideal for decubitus projections during air contrast enemas. This positioner provides a full 1½ elevation of the body achieving ideal conditions for radiographic visualization of both abdominal walls.

- Poly-Guard™ Coated
- Foam construction is firm but soft
- Coating will not absorb H2O, barium or other agents
- High-friction surface eliminates slippage

PB-002 $146

Auto Traction Strap

Pull shoulders down so that C7 may be visualized in cross lateral projections. Patient applies equal traction on each arm by extending legs, tightening straps. Strap may be adjusted for patients of varying height.

P-135 $142

Chest-X-Support™

The Chest-X-Support™ helps patients steady themselves during the performance of lateral chest exams. The unit can be mounted to any sturdy wall and comes in a choice of 36" or 48" bar to match the offset of the existing wall, cassette holder, or bucky.

Features:
- 11 Height adjustments
- Secure bar position lock
- One year limited manufacturers’ warranty

N-251 36" unit $721
N-250 48" unit $731

www.aadcomed.com
Radiopaque Measuring Scales

Multi-Purpose for General Radiography and C.A.T. Scanners

- N-102 length 115cm.
- N-100 length 45cm.
- Both with .5 cm graduations

These special rulers are used whenever a direct reading or measurements on the radiograph is necessary. Deep, .5 cm graduations are engraved into tough acrylic plastic and filled with a special radiopaque compound to give a distinct reading on the radiograph. Translucent plastic with die cut legend containing sufficient opaque compound for high Kvp work. Has center line marking for topographic recording. Ruler allows direct reading of measurements on the radiograph by one single exposure without further computation or obscuring of the X-ray image. The opaque scale is manufactured from an extra strong 3/8" thick acrylic which prevents breakage and raises the scale slightly to be in a similar plane with bones. Available in both 45cm and 115 cm lengths with a hole for hanging and storage.

N-102 - 115cm ruler $410
N-100 - 45cm ruler $297

See-Thru Radiographic Ruler

18”Lx2”W ruler of Transparent Acrylic facilitates viewing and measuring of anatomical structures of all types. This ruler provides easy to read graph type scales. English Scale (to 1/16") and Metric Scale (to millimeters). Centimeter bars extend to english scale for easy comparison.

N-365 $8 each 12 or more $7 each

X-Ray Caliper

Our aluminum X-ray Thickness Caliper incorporates the quality design features of more expensive calipers with genuine improvements and American Craftsmanship. The caliper is calibrated in both inches and centimeters to measure the thickness of areas to be x-rayed.

Caliper Features:
- Dual Centimeter and Inch Scales
- Lightweight Aluminum Construction
- 1" W x 17.25" L x 10.125" D
- Measures 1" to 16" (0 to 40 cm) in .5" increments

**Roll Aid Patient Transfer Aids**

This lightweight patient transfer device allows two or even one person to move a patient from one surface to another without lifting and with relative ease. Patients may be transferred from stretcher to exam table or from stretcher to bed, even up to a surface 3" higher than bed or stretcher. This device eliminates the need of involving 4 or 5 people in transferring patients and greatly reduces the risk of back injuries.

Note: Covers may be autoclaved.

---

**Quik-Strap™**

Quik-Strap™ eliminates the need to use adhesive tapes to secure patients when positioning or restraining. This strong but comfortable strap is a versatile Velcro® type material, which may be cut to any length desired. The strap seals to itself with a Velcro® type closure, placing a soft pile material against the patient’s skin. The result is a strap which can serve many purposes without the discomfort and risk of skin injury associated with adhesive tape.

Built specifically for MRI use, our Ceiling Mounted Counter-Poised MRI-Safe® Equipment Suspension provides outstanding versatility of use in MRI Labs for a large number of MRI equipment applications. When strategically placed, they allow for equipment to be located in a wide variety of positions. Manufactured entirely of Non-Ferrous Materials, our MRI-Safe® Overhead Systems are non-magnetic to 3 Tesla. In addition to providing a near ideal mounting platform for MRI Injectors, our Equipment Suspensions are versatile and can be used to mount a wide variety of other MRI Lab devices.

**Internalized Wiring and Fiber Optics, Easily Installed in the Field**

**Introducing**

Our New OSP-14 Dual Mount model arm and Column, that allows all wiring, fiber optics, tubing etc, to be internalized during field equipment installation. The wiring channel can then be easily closed or opened for access and modifications of equipment. Available with one or dual arms, in both Conventional, & MRI-Safe® Models.

MRI-Safe® Acrylic Overhead X-ray Barriers

Center Mounted Barriers, with their ball & socket center mount, can rotate 360 degrees, allowing them to be turned horizontally, vertically, or at any angle, making them very versatile. They are available with or without torso placement contour cutout. They are available in three sizes; 76cm. high x 61cm. (30”x24”), 60cm. high x 50cm. (24”x20”) and 50cm. high x 40cm. (20”x16”). All sizes are supplied with either a single device ceiling mount that allows 360 degree rotation or a dual device mount ceiling column to allow the mounting of a second shield, a surgical lamp, or other device such as a pressure injector or video monitor. A single wall mount is also available and a 2.5 meter long track system that will accommodate either the dual or single ceiling mounts is also available separately. All barriers shown are 0.5mm lead equivalent.

- OS-596NF 76x 61 cm. Barrier
- OS-596NF 76x 61 cm. Barrier with cutout
- OS-765NF 60x 50 cm. Barrier
- OS-765NF 60x 50 cm. Barrier with cutout
- OS-745NF 50x 40 cm. Barrier

Protective Curtain for Barriers
Can be used on any of our MRI-Safe® Barriers. Whether they are ordered with the barrier or as a retrofit, RayShield® Protective Curtains are easy to install with self-adhesive Velcro that’s supplied with the curtain.

S-361C for 61 cm. wide Barriers with cut-out $1,440
S-361 for 61 cm. wide Barriers without cut-out $846
S-356 for 50 cm. wide Barriers without cut-out $697
S-357 for 50 cm. wide Barriers with cut-out $1,266
S-358 for 40 cm. wide Barriers $601

Fixed Height RayShield® Acrylic Mobile X-ray Barriers solve a variety of X-ray Protection problems while offering a wide field of view and excellent X-ray body protection. Each is designed with an optically clear viewing area made of shatter resistant durable 0.5mm lead equivalent acrylic, and is brush finished, highly durable, 6061 Aluminum Frame.

With no paint to chip, these barriers maintain their like new appearance for many years. Opaque Panel is highly durable kydex material. Casters are medical grade. Foot operated caster locks allow for fixing barrier position. Lifetime Warranty on defects in materials and workmanship.

Mobile Barriers are available in conventional and MRI-Safe® constructions listed below. MR Conditional to 3 Tesla.

MRI-Safe® Pole Mount Retrofit

A purpose built device for MRI & CT Gantry use, our Pole Mounted Counter-Poised Equipment Suspension provides outstanding reach and versatility of use in MRI & CT Labs.

Simplicity of installation allows this device to be installed without interference with or penetration of the Faraday RF Shield in MR Labs. Cementing a small piece of plywood to that shield above the Drop Ceiling provides the minimal required support with most weight being transferred to the floor.

The pole can be placed as shown, directly beside the MRI Gantry, allowing excellent injector placement and storage.

Manufactured entirely of Non-Ferrous materials, our MRI Counter-Poised Stand is non-magnetic to 3 Tesla. In addition to providing a near ideal mounting platform for Pressure Injectors, this Equipment Suspension is versatile and can potentially be used to mount a variety of other devices.

OSP-740NF MRI-Safe® Pole Mount for MRI $5,669
OSP-740 Conventional Pole Mount for CT $4,302

Above: Pole mount installed tight to MR Gantry
Left: Plywood cemented to Faraday RF Shield provides ceiling fastening without shield interference
Patent Pending

MRI-Safe® Products
Nationwide Sales, Installation & Service 1-800-225-9014 www.aadcomed.com
Our MRI-Safe® Mobile Procedure Lamp is state of the art using the latest advances in lighting technologies while only using 50% consumption of power to produce a very powerful 75,000 Lux with infinite focus.

The MRI-Safe® Lamp runs on 24VDC BatteryPack, which offers 8 hours of operating time between charges. The Lamp Head is 19cm in diameter, with Infinite focus, illuminated field size 14 to 25 cm depending on subject to lamp distance. The lamp includes a removable sterilizable handle.

Our Mobile Stands move easily on 4 casters. All arms are internally counterbalanced and provide 35 degree upward and downward motion, as well as 30 degree rotation independent of the stand. Lampheads are sealed, and can be operated and focused, tilted, and rotated 360 degrees, with one hand.

MRI-Safe® mobile stand models are fully tested to 3 Tesla and UL listed. They are made entirely of non-magnetic materials.

The OS-81651LNFBP is an MRI-Safe® Lamp and Stand, (same as above) but with our 75,000 Lux ErgoLite® LED lamp with infinite focus. The lamp operates Rechargeable 24V DC Battery Pack. Remote Recharger plugs into 110-120VAC standard wall outlet outside the MR shielded area.

Caution: Remote Power Supply for MRI-Safe® Lamp is magnetic, and must be plugged in at a location outside the MRI Shielded Area.

Copyright 2019 AADCO Medical, Inc. All rights reserved. Not responsible for errors typographical or otherwise. All product prices and specifications are subject to change without notice. Orbis Cover Photos by Geoff Oliver Bugbee.
All products sold exclusively under AADCO Medical Inc., terms and conditions, see next page.
When you order from AADCO Medical, Inc., you order the best quality products available, Advanced Products™. Your satisfaction with product is very important to us. If you have a problem, please call. We want to know if you are less than satisfied.

Order by telephone: If you have ordered our products previously, it is helpful if you know your customer number when placing an order.

Freight, Packaging & Handling Charges: Please note all orders are FOB point of origin. Orders under $100 are assessed a $10 Handling Charge. AADCO Medical, Inc., reserves the right to assess additional freight, packaging, handling and carrying charges when circumstances or account status warrant. Orders that are picked up by the customer’s carrier are assessed handling charges for packaging and handling.

Discount: Quantity discounts are available on some of our more popular items. Please call to inquire.

Terms: Open account terms, subject to approval for business accounts, are net 30 days. A service charge of 1.5% per month and all costs of collection are charged to past due accounts. All published prices are cash sale prices, excluding shipping. Cash prices are applicable for cash, open account and COD customers only. When specifically requested, product prices will be quoted to include shipping. Open account terms are subject to review and change at the sole discretion of AADCO Medical, Inc. Issuance of an order to AADCO Medical, Inc., is a defacto acceptance of our terms and conditions as set forth in this order information summary. Mastercard, Visa, American Express and checks may be used for approved purchases.

Warranty: Except as specifically written, products are sold without warranty. In most cases there is a manufacturers warranty, which provides the customer with warranty protection. Except for products intended for 1 time use (disposable products), all products which are manufactured under the AADCO Medical, Inc. label, unless otherwise noted in this catalog are covered by a one year warranty limited to product replacement liability for defects in materials or workmanship at the sole discretion of AADCO Medical, Inc. No other warranties, whether express or implied, are provided. AADCO Medical, Inc’s liability in all cases shall be limited to the replacement value of the product.

Returns: Prior authorization is required on all returns. Warranty claim returns, once authorized, must be shipped, freight paid, to our warehouse. Returns are made for exchange or merchandise credit only and must be made within 30 days of the invoice date. Merchandise credits are redeemable for a period of 6 months from the date of issuance. All product returns for credit must be in original packaging and in new and resalable condition.

Shipping: All shipping charges are added to your invoice. Generally, shipments are sent via FedEx Ground. Some shipments may be sent by common carrier. All shipments are FOB, point of origin.

Damaged Goods: On occasion, a shipment may arrive damaged. Since this is the responsibility of the freight carrier, a claim must be placed with them. To do so, contact our Customer Service Dept. immediately to initiate processing. After a claim has been placed, your goods can be promptly replaced. Please keep all of your packages and evidence of shipping available for the carrier's inspection.

Insurance: To better cover freight damage, full retail value insurance is placed on every shipment. Insurance charges are added to your invoice to provide 100% coverage of the merchandise value.
FerrAlert™ Halo II Plus

The Latest Advancement in Ferromagnetic Detection for MRI Safety

The Best Ferromagnetic Detector for ACR Zone IV Protection

Guards at the entrance into the MRI exam room, providing the most precise and reliable detection and prevention of ferromagnetic threats from entering Zone IV. FerrAlert™ HALO II Plus provides significant assistance in the prevention of serious injury to patients and staff or equipment damage. Our New Visual Advanced Warning Technology alerts on the approach of ferromagnetic threats to Zone IV, well before the portal is reached. The greater the threat, the further away the warning is activated.

Unlike other detectors that mainly focus on the security market (jails, prisons, mental institutions, etc...), FerrAlert™ Detection Systems are exclusively designed for MRI Safety. FerrAlert™ Halo II Plus guards at the entrance into the MRI exam room, providing the most precise and reliable detection and prevention of ferromagnetic threats from entering Zone IV.

FerrAlert™ Halo II Plus provides significant assistance in the prevention of serious injury to patients and staff or equipment damage. FerrAlert™ detectors are recognized to be the most accurate ferromagnetic detectors for MRI due to their exclusive location-specificity feature. FerrAlert™ detectors have been independently tested to be the most sensitive in real-world MRI environments due to its unique and patented sensor technology.

Catalog # NF-101A     Ferralert Halo Plus 2
$33,100 includes Installation

FerrAlert™ SOLO

The Latest Advancement in Ferromagnetic Detection for MRI Safety

The best Ferromagnetic Detector solution for ACR Zones II and III Pre-Screening

Installed in the controlled pre-screening zone, FerrAlert™ SOLO is the highest sensitivity, full-body patient and personnel pre-screener available to MRI providers. Our Proprietary Sensor Technology allows for the detection of very small ferromagnetic objects, such as a typical hairpin or paperclip.

Catalog # NF102A     Ferralert Solo
$18,400 Includes Installation

MRI-Safe® Safety Screening Equipment

Nationwide Sales, Installation & Service 1-800-225-9014  www.aadcomed.com
FerrAlert™ Encompass

FerrAlert™ Encompass automatically detects and logs unintended ferromagnetic objects entering Zone IV. It is the only system that provides a photographic stream and does not require manual logging, thus allowing the technologists to perform uninterrupted patient care without wasting time with self-reporting. The data analysis software allows effortless generation of reports for The Joint Commission inspections. It also allows for the analysis of safety trends that can be shared throughout the entire hospital system.

Catalog # NF-101AE     $38,000
Includes Installation

GaussAlert™

Magnetic Field Strength Alarm, Ferromagnetic Detector

GaussAlert™ is designed to help keep MR Conditional equipment outside of the MRI exclusion zone. GaussAlert™ is programmed to alarm when the preset magnetic field strength is exceeded. It produces an attention-getting audio alarm when MR Conditional equipment is too close to the MRI magnet.

Medical equipment that is used in the MRI room, such as infusion pumps, contrast injectors, patient monitors, anesthesia machines and others may malfunction and potentially injure the patient if not kept outside of a specific magnetic field strength. In addition, MR Conditional equipment can degrade the image quality of a scan if brought too close to the MRI magnet. With GaussAlert™, the possibility of equipment malfunction and image degradation is dramatically reduced.

Ferromagnetic Detector
